Microsoft Sentinel Implementation

Get Microsoft Sentinel production—
ready with one of Microsoft's top global
implementation partners

WHAT WE OFFER

About Difenda's Microsoft Sentinel Implementation

Difenda is a world-class, certified, and accredited cybersecurity company and Microsoft's top global implementation partner for Microsoft Sentinel. Rapidly deploy and get Microsoft Sentinel production-ready with enhanced configuration, custom development, integrations, ongoing support, and project management.

Go from concept to production-ready with our Rapid Cover™ deployment methodology. Difenda takes a collaborative approach through the initial design and planning sessions. Next, we leverage automation and orchestration tools so your organization can unlock Microsoft Sentinel's full potential.

Microsoft Sentinel offers the best in Security Information and Event Management (SIEM) and Security Orchestration, Automation, and Response (SOAR). Difenda's development services use purpose-built customizations to keep the focus on your business processes and the outcomes you want.

Implementing an advanced platform like Microsoft Sentinel is a complex task. Every project is assigned a PMI®-certified project management professionals to keep your project on task, on time, and on budget—with full visibility into deployment, configuration, and complete tracking of project risks.

Getting truly enterprise-wide visibility means getting data from other hardware and software sources. Difenda can integrate Microsoft log sources and any non-Microsoft log sources using out-of-the-box integrations and our custom development services.
