

Azure Backup

a 2-Weeks Implementation for your peace of mind

The Azure Backup solution is the answer to all your backup needs, no matter where your infrastructure is hosted, cloud or on-premises.

Our team of Azure Certified Consultants and Azure Certified engineers are the most qualified to implement an Azure Backup solution that will cover your day-to-day backup needs without the need of expensive storage or dedicated backup equipment.

With Azure Backup you will find peace of mind knowing that it will flawlessly protect the following infrastructures:

On-Premises

- ▶ **VMware & Hyper-V environment** with Windows or Linux VMs
- ▶ **Microsoft based workloads** (Exchange, SQL, SharePoint, AD etc)
- ▶ **Files, Folders, Disks** on Windows based machines

Cloud

- ▶ **Azure VMs**

DELIVERABLES

1

Design the backup strategy that covers customer needs.
