Assessment**

Azure Cloud Migration: 4-week Assessment

BlueSoft offers an Azure Cloud Migration Assessment designed by experts to analyze your existing IT infrastructure and environment. Our team will outline which migration methods bring the most value to your company - keeping in mind budget and time constraints.

What does the Azure Cloud Migration Assessment look like?

Initial phase - gathering information

First, we will review your organization's current situation, infrastructure, creation, and design. Then we will talk about challenges, problems, and growth plans.

Next step - defining the scope

We will now develop a clear picture of the current state, how it aligns with your short and long-term needs, and actionable insights on how to begin progressing on the roadmap. Besides that, our engineers will provide recommendations on the most suitable technology stacks.

Final phase - closing workshop

We emphasize knowledge sharing. During the closing workshop, we will discuss the document's content and the results of the assessment.

Azure Cloud Migration: 4-week Assessment

Duration:
4 weeks

Why it's worth migrating your company to the cloud?

- 1 Reduced cost of maintenance of the infrastructure
- 2 Your organization can scale the resources
- 3 Ease of Accessibility
- 4 Data Security
- 5 Saved time
