DATA AND INFRASTRUCTURE MIGRATION ASSESSMENT

We're here to help evaluate your overall infrastructure in relation to on-premises deployments and future cloud-strategy with insights on the business, cost savings, and technology benefits of migration.

COVID-19

The proportion of IT spending that is being allocated to cloud will accelerate even further in the aftermath of the COVID-19 crisis
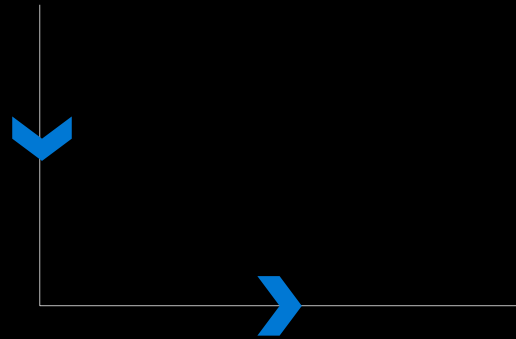

DIGITAL BUSINESS CAPABILITIES

The worldwide public cloud services market is forecast to grow 17% in 2020 to total $266.4 billion, up from $227.8 billion in 2019, according to Gartner, Inc.

"At this point, cloud adoption is mainstream, the expectations of the outcomes associated with cloud investments therefore are also higher. Adoption of next-generation solutions are almost always 'cloud-enhanced' solutions, meaning they build on the strengths of a cloud platform to deliver digital business capabilities."

Sid Nag,

Research vice president at Gartner
