

Microsoft Rapid Data Assessment

Drive your data strategy to focus on better business outcomes.

HOW IT WORKS:

Many organizations know they need to leverage data for their business decisions but are unsure where to start. The enablement and adoption will become automatic as you show rapid results outlining the art of the possible. Our team uses an interview process and ultimately aligns executives to a business focused outcome leveraging Microsoft Azure Cloud Components.

Our practical approach will help you identify the data you really need and deliver the reports to help you make smarter, faster decisions.

TIMELINE:

Step 1: Facilitate user workshops to understand business goals and challenges and identify use cases

Step 2: Use case deep dive to gain an understanding around current data, environment architecture, and objectives

Step 3: Design architecture feasibility and approach

Step 4: Storyboard mock-up of the solution to visualize the art of the possible

RESULTS:

- ▶ Increased speed to market
- ▶ Identification of new business insights
- ▶ Ability to achieve a competitive advantage
