

agnostic intelligence Executive Summary

Agnostic Intelligence will make the world a **safer place**. We will offer the leading global agnostic platform for **cyber & company risk analytics** by automating and connecting tools, information, and data to create a holistic and transparent overview of company cyber risks.

The Agnostic Platform

Centralisation - Digitisation - Automation

- Agnostic Intelligence **reduces risk & cost** and provides supplier security **assurance**
- **AI-powered** platform analyses different information and risk sources
- **Continuous** update of company cyber security posture
- **Automated** management of **millions of questionnaires** and **assessments** of suppliers
- Analysis and **plausibility checks** of questionnaires
- Open & independent API layer for **data integration**, high **scalability** and enhanced **platform speed**

What makes the Agnostic Platform Unique

- **Customer's label** on interface and communication (e.g., customized subdomain)
- **Holistic, 360-Degree** risk view of supplier portfolio for **desktop** and **mobile**
- Data processing in **customer's regions**

Global agnostic platform with **automated questionnaire** management

Best-in-class, **secure** and scalable cloud platform technology

75% time and **cost reduction** in supplier security management

All risks addressed in **real-time** in a **single platform**

Unlimited use of the platform.

Add-ons: Customized APIs, external assessor, security reports, company specific news, AI engines

Challenges

Increased **cyber-attacks** and new **regulations**

Fragmented information on supplier risks and **no central** data base

High **costs** for labour, tools & professional services - **low ROI** in Information Security

Thousands of IT tools for risk, cyber security, and compliance

Partial view of real supplier security posture

Manual processes and lack of security resources

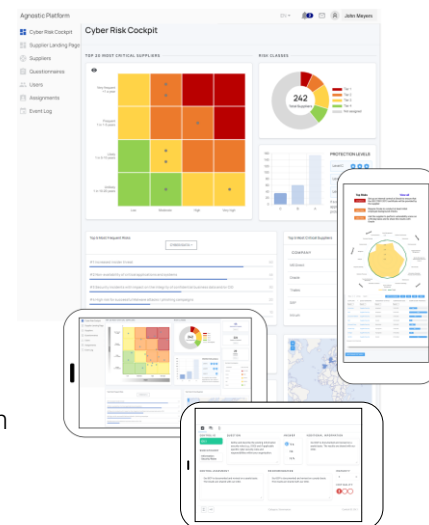

Millions of questionnaires and suppliers often answer via **e-mail**

Suppliers do **not** want to disclose confidential information

Solution

- **One click** for all relevant information on a supplier for **CRO, CIO/CISO** and **Procurement Manager**
- Use of standard templates or creation, management, and storage of **customized questionnaires**
- Comprehensive supplier security risk **assessment on the platform** and export of relevant data
- Platform is **agnostic** for integration of information, data, customer tools, and partner products & services
- Integrating data from
 - Procurement (e.g., SAP)
 - Internal IT tools (e.g., SIEM/SOC)
 - Cyber security rating tools
 - Threat intelligence
- Direct and transparent **communication** with other stakeholders directly on the platform
- **Secure exchange** with interest groups
