Optimise Your Cloud Usage with Arq Group

Consulting Offer

Optimise your cloud approach to reduce cost and maximise benefit

Arq Group can help your organisation improve efficiency in cloud to reduce cost, improve customer experience, and simplify operations. We will work with your team to identify areas for improvement and produce a plan for optimisation. We will also help you access Microsoft Azure funding and incentives where possible.

There is no up-front cost to the engagement; Arq Group fees amount to a percentage of realised Year 1 savings.

Benefits

- Reduce spend and eliminate waste
- Improve reliability to enhance customer experience
- Improve security insight
- Reduce operational overhead
- Modernise architecture to accelerate benefits realisation

Customer contribution

- Provide access to environment and accounts
- Provide overview of current cloud strategy and operations

Key activities

Conduct data collection to support analysis

Explore strategic objectives for cloud, including existing pain points, and opportunities for modernisation

Review findings and define scope of work for benefit realisation

Develop business case inputs for application modernisation, including cost / benefit analysis
