Software company relies on the cloud to transform its IT

Software publisher

- **Independent publisher and distributor of value-added document solutions for B-to-B**
- **420 employees**
- **16 locations in France**
- **10,000 customers**

Challenges

- Transform your IT to the cloud
- Analyze the opportunity to migrate IT infrastructures to the cloud
- Study the eligibility of applications for the cloud and identify the challenges and impacts (organizational, process, technological)
- Outsource the management of virtualized workstations

Challenges

Professional Services & Cloud Readiness Assessment

- Mapping of the Information System (Networks, infrastructure, applications)
- Audit of the IT Service Management maturity level
- Study of the eligibility of applications for the cloud
- Cloud recommendation plan
- Evaluation of the budget for transformation to the cloud and management of the virtualized desktop

Benefits

- A detailed, state-of-the-art strategic plan that allows it to define the steps for its IT transformation to the cloud and the outsourcing of its desktop management
- The prospect of a digital transformation based on the cloud
