

Window Virtual Desktop

Windows Virtual Desktop is a comprehensive application and desktop virtualization service that runs in the cloud. It is the only virtual desktop infrastructure (VDI) that offers simplified administration, Windows 10 for multiple sessions, optimizations of Microsoft 365 Applications for companies and compatibility with Remote Desktop Services (RDS) environments. Deploy and scale Windows desktops and applications to Azure in just a few minutes and get built-in security and compliance features.

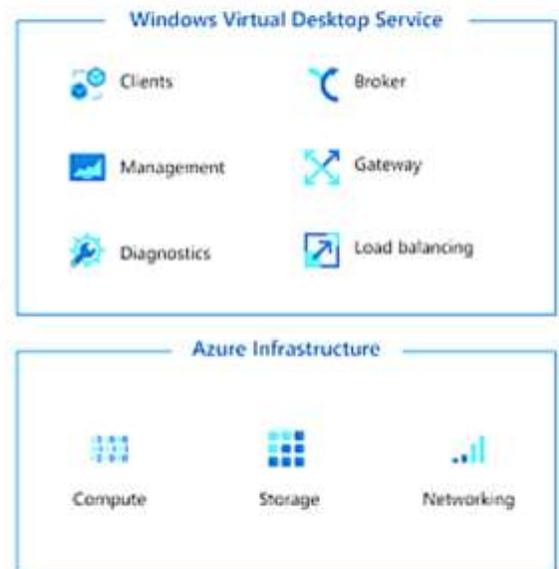

Window Virtual Desktop

Your subscription—your control

Managed by Microsoft

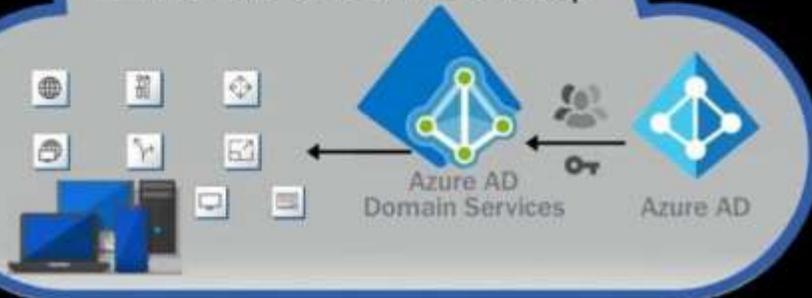

Enable development and test scenarios, including virtual development desktops and simplified management of load and scale test virtual machines (VMs), with Windows Virtual Desktop. Take advantage of this service to quickly test .NET, UWP, and other applications, including end-user acceptance tests for critical line-of-business (LOB) applications.

Microsoft 365

Windows Virtual Desktop

Deliver the only multi-session Windows 10 virtual desktop experience

Provide your users with the only multi-session Windows 10 virtualized desktop in the cloud that offers high availability, is always up-to-date and available in any service

Deploy and scale in minutes

Quickly virtualize and deploy legacy and current desktop applications in minutes with unified management in Azure Portal.

Enable Microsoft 365 app optimizations for business

Deliver the best experience with Microsoft 365 apps for business, with multi-session virtual desktop scenarios that deliver the most productive virtualized experience for users.

Migrate remote Windows Server applications and desktops to Azure

Migrate your Remote Desktop Services (RDS) environment with a simplified administration and deployment experience in Azure.
