COMMON CHALLENGES

Inability to secure M365 emails and endpoints

Limited to no classification or labeling of structured and unstructured data

Data Governance and Protection

Leveraging Microsoft Azure security capabilities to the fullest extent

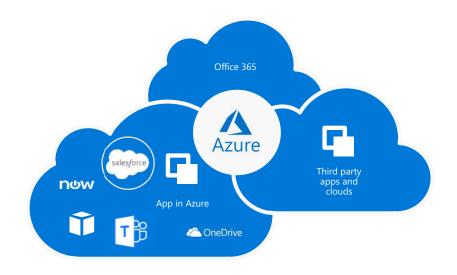

Risk of a breach when data is used outside of Microsoft applications

An effective cloud strategy requires inclusion of a comprehensive data governance and protection

WHAT WE DO

DATA CLASSIFICATION AND POLICY DEPLOYMENT

Take inventory

- Identify data sources and discover structure and unstructured data
- What is impacted by regulations
- Recommend data classification and sensitive data type
 - Classify key/critical roles
 - Define a set of position classifications
- Create data governance policies

AUTOMATED DATA LABELING SUPPORT

- Define automated labeling and configuration
 - Based on developed policies
- Set Azure conditional access policies
- Facilitate cross-org discussions
- Define a data labeling schema
- Apply data classification labels to discovered data

PROTECT ENDPOINT DATA SECURITY

- Secure email and critical data inventory
 - O365 enabled with DLP and Microsoft Cloud App Security MCAS
- Define/integrate DLP within MCAS
- Ensure MCAS integration with M365 and AIP/MIP
- Intune endpoint data management through MAM policies

Outcomes

For users extending into additional Microsoft Azure services, Optiv enables data governance and protection of both structured and unstructured data

IMPROVE SECURITY SAFEGUARDS

Reduce risk through proper structured and unstructured data control

CONTROL AND SECURE ENDPOINTS

Protect sensitive data within email and other Microsoft Office applications

DATA LIFECYCLE PROTECTION

Secure data through automated labeling and set policies in support of the data lifecycle

UNLOCK MICROSOFT AZURE VALUE

Enable Microsoft features and capabilities without compromising data security

ӑ҉ҏтіѵ

WHY OPTIV FOR MICROSOFT

Extension of Microsoft Team

Extension of in-house expertise in Access Management, Identity Governance and Data Governance & Protection across Microsoft technologies

Secure Cloud Adoption

Optiv supports clients as they move to the cloud with security-by-design as a core principle for secure cloud adoption

Business Alignment

Map strategy to measurable business outcomes (i.e. full optimization of O365 investment)

Leverage our Strengths

Optiv, as an SSI, goes beyond consulting with implementation, migration and management capabilities to enable clients through their Microsoft security journey

Holistic Approach

Optiv approaches Microsoft technologies with end-toend services from multiple practices such as Cyber Operations, Threat, Risk, etc.

Agile and Proactive

Optiv's approach can advance how Microsoft features are securely used and consumed – with a keen eye for identifying security gaps

Industry Expertise

Unique and proven methodology quickly shows value leveraging Optiv best practices and Microsoft's guidelines
