

 **biqsens**

Knowledge  
hidden in data

# Knowledge hidden in data

Raw data from various sources alone is not enough for you to obtain the necessary information. You need the right tools in order to effectively collect them in one place and read them. Those that will reveal all regularities and dependencies in the most accessible and transparent way.

This is where **Biqsens** - an analytical platform based on the leading **Microsoft Power BI** environment - comes in handy.

Easy-to-understand visualizations make it easy for you to see what's in complex data sets. With just a few clicks, you can move between different levels of detail and analyze the data from multiple angles.

You don't need any special qualifications for this. **Biqsens** analytics are designed so that you can get to the information you need in the easiest way and in a short time.

# Secure access according to hierarchy

You also don't have to worry about data security.

**Biqsens** is based on the security-leading **Microsoft Azure** cloud.

You can arrange access to data in your company according to a hierarchy, so that each user sees only what he needs.

# Scoreboard in your pocket

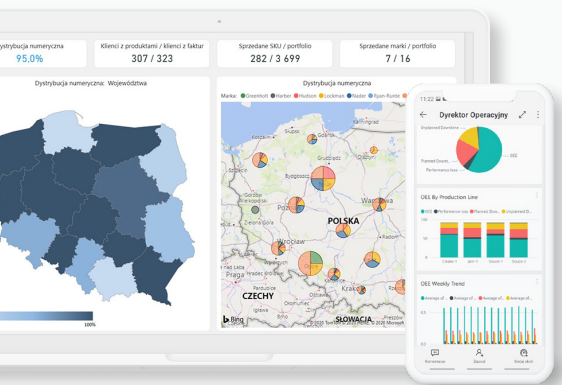

**Biqsens** analytics have been designed to reflect the most important areas of your business. They are also correlated with the solutions available on the **Emigo Platform**. At the moment, there are over 75 of them, and their number is constantly growing. But that's not all. **You can also create your own dashboards.**

Thanks to them, just like in the cockpit of an airplane, you will have quick access to the most important indicators of your choice.

**This applies to both computer users and representatives with mobile devices.**

With **Biqsens**, information is always at your fingertips.

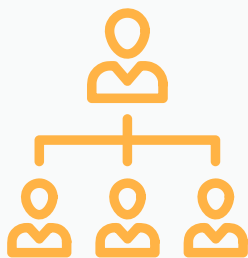

# Biqsens – knowledge, action, competitive advantage

Building of a competitive advantage in an effective way now seems impossible without reliable knowledge and facts obtained from comprehensive data.

**Collecting data from various sources in one place not only improves the analysis itself, but also reduces costs and saves your time.**

**By using a Biqsens analytics, you can focus more on developing and implementing the right strategy and actions** - all the information and facts you need are at your fingertips.

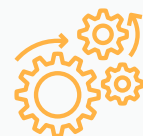

This applies to employees at all levels of the hierarchy, from representatives, to regional managers, to key decision makers. With **Biqsens**, the flow of information in the company becomes fast, secure and, above all, effective.

**Each organizational unit and employee have convenient access to the information they need most in real time.**

If data is the fuel that drives a business, **Biqsens** is the engine that actually makes it move.
