Azure Everywhere

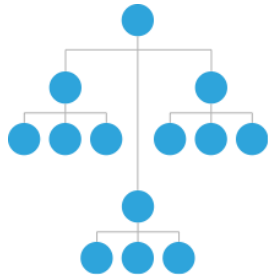

8405 Greensboro Drive, 7th Floor
McLean, VA 22102

We Work With You the Way You Want

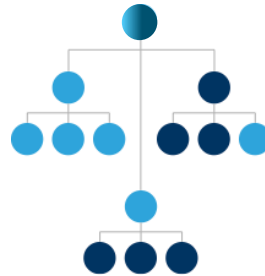

FOR YOU

Give us a project to manage from start to finish.

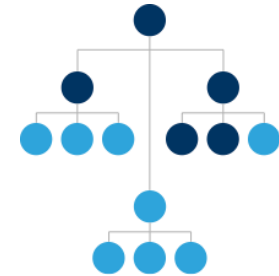

WITH YOU

Collaborate with Celerity subject matter experts on a consulting basis.

SUPPORTING YOU

Place individual contributors side-by-side with your team.

Single Account Management Structure

● Celerity ● Client

Celerity's Agile Cloud Framework (ACF)

Education and Envisioning

- What are drivers and opportunities to move to the cloud?

Architecture and Governance

- Create a strong foundation, management and reporting structure

Infrastructure and Operations

- Build, Configure, Automate, Secure and Manage

Applications Assessment

- Assess your portfolio of resources, cloud readiness of applications

Application Migration

- Lay out your strategy, sequence and schedule for migration

Application Onboarding

- Migrate applications, optimize, standardize and scale

Our Design Philosophy

Data-Driven designs that use robust monitoring and reporting to allow you to take a proactive stance

Standardized resources provide the building blocks for a simple, self-healing infrastructure

Automation of maintenance, deployment, and remediation tasks to minimize outages and reduce overhead

Governed by integrated and automatic regulatory compliance reporting and auditing. Configuration management to maintain and verify compliance

Results in a cloud environment that can be scaled effectively and efficiently

Secured using behavior analysis and identity protection coupled with a “defense in depth” security design

Azure Everywhere - First Cloud

- Companies looking to extend their datacenter to the cloud require performance, security and scalability
- Celerity's Azure First Cloud Engagement is a 3-day, hands-on engagement
 - Initial Whiteboarding and Planning
 - Azure Consumption Calculator Tool
 - Provides workload detail;
 - Cost per workload
 - Red, Yellow and Green rating for Azure workload candidates
 - Final Presentation – Whiteboard, Concept Migration Plan and Cost Analysis
