

# CLOUD-NATIVE DATACENTER MANAGEMENT WITH AZURE ARC

Connect your on-premise machines to Azure, so you can manage and govern them through a single pane of glass.

## CLOUD-FIRST HYBRID MANAGEMENT

Simplify the management of complex and distributed environments across private & public clouds, datacenters, and edge.

Azure Arc finally brings cloud first hybrid management to micro-, data and traditional services - with a focus on standardization, interoperability, and compliancy - allowing you to have the insights and management capabilities using the central Azure control plane.

## READINESS ASSESSMENT ACTIVITIES

- Define onboarding methodology for Azure ARC
- Define which machines will be in scope.
- Bulk deployment script development
- Integration with Azure Policy
- Integration with Azure Security Center
- Integration with Update Management
- Integration with Inventory & Change Management
- Integration with Azure Monitor
- Specific dashboarding via our visualization platform DExports Cloud Insights

## 5-DAY READINESS ASSESSMENT

During these 5-days, a DexMach Solution Architect sits down with you and evaluates your environment maturity level.

The assessment activities are outlined below.

After analysis a gap report and statement of work is created to fully integrate the Azure Arc hybrid management services.

Plan your readiness assessment for Azure Arc with DexMach today.
