

WHAT IS AZURE VMWARE SOLUTION (AVS)?

Microsoft: Azure VMware Solution (AVS)

IN AN AS COMPREHENSIBLE WAY POSSIBLE

IN A NUTSHELL

AVS is a hybrid cloud service. It allows VMware software-defined data centres (SDDC) to be migrated seamlessly to, and operate in full functioning order within the Microsoft Azure Infrastructure.

GOOD TO KNOW

→ AVS is VMware verified and managed by Microsoft

- AVS is Microsoft service verified by VMware which is continuously tested for enhancements and upgrades, and runs on the Azure Infrastructure.
- Microsoft manages and maintains private cloud infrastructure and software.

AVS allows organisations to focus on the development and running of private cloud workloads.
