Competitive advantages

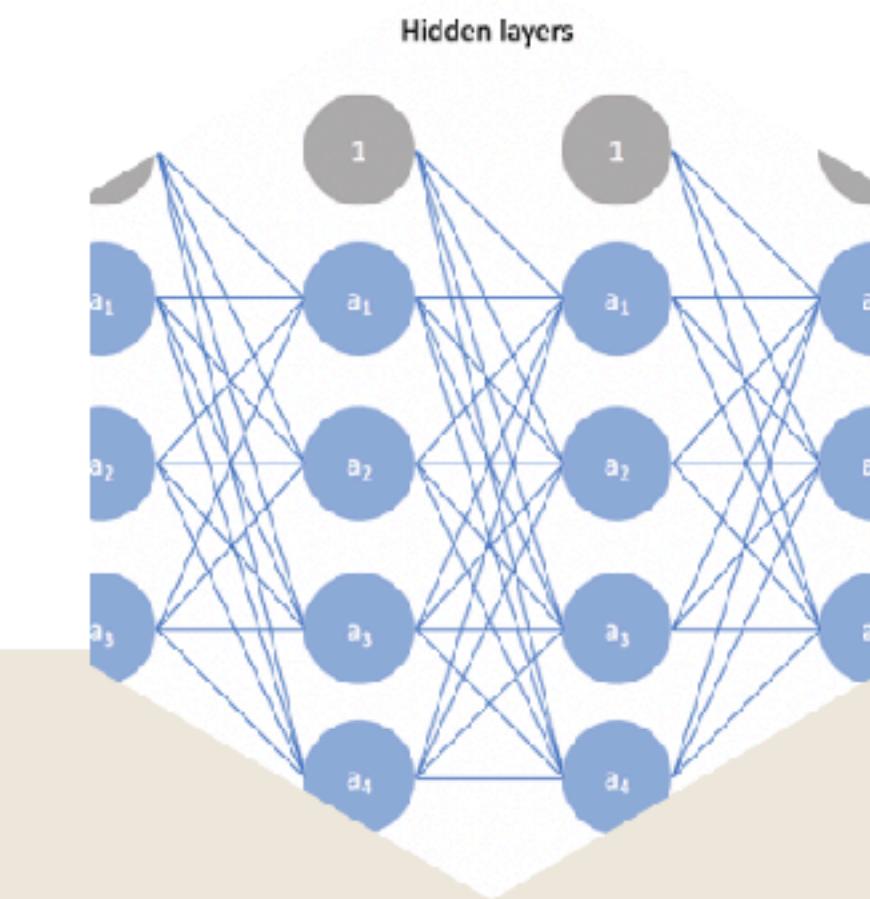

SENSITIVITY/PRIVACY

Voicebot service involves lots of client's data and would touch the sensitive privacy issue. Most international companies would be aware of not using public engines like Badu and Microsoft and asking for services on premises. Positioning in APAC, Asiabots is targeting in overseas so the engines are able to be on premises and maintain privacy.

SELF DEVELOPED A.I. ENGINES

Self developed engines allowing our services to be tuned and landed most fitting to the needs of the services for our clients. The core engine is ready and helps greatly shorten the training time and deployment time. Despite a structured service, customized functions are allowed to built to fit for unique services' needs.

EXPERIENCE AND EXPERTISE

Professions in A.I. areas for many years. Years of accumulation of R&D is crucial for A.I. industries. This is the reason why Asiabots keep creating interesting products with high standard, The natural humanlike voice, all-in-one telephony system, AI ambassador and more. Asiabots understand the technical trends and contributes on the AI transformation for the world.
