

# WHAT IF

YOU COULD MANAGE YOUR TRIAL COURT  
CASELOAD SO IT DIDN'T MANAGE YOU?

**C-Track**  
**Case Management**  
**for Trial Courts**

# C-TRACK CASE MANAGEMENT FOR TRIAL COURTS.

Your trial court is more than a place to debate legal details. It's where the community sees justice served and the law upheld. But your court is also now charged with handling more cases, often with fewer resources. You need a case management system that will adapt to your growing, changing needs, one that integrates with other tools so you can continue to effectively serve your community's interests for years to come.

## **Comprehensive. Configurable. Consistent.**

**C-Track® is comprehensive.** It's a proven case management system that works for every user, across every function of the court, throughout every case type to decrease workload pressures throughout all court departments.

**C-Track is configurable.** It's scalable and easily adapts to meet your court's specific needs, unique rules, and critical processes. It allows rules to be changed quickly and easily, without the need for technical support.

**C-Track is consistent.** 100 percent of installed customers are still using it. Why? Because C-Track is consistently being improved. As technology evolves, so does C-Track.

## **Easy-to-use, powerful technology**

C-Track helps you create the most efficient, streamlined workflow possible by providing the best of both worlds – a highly adaptable solution that's technologically superior and robust as well as a user interface that is intuitively easy to use and maintain.

## **Integrates with other court solutions**

C-Track eliminates redundancies by allowing important data to be shared with external partners through its integration module, which increases

transparency internally and externally. And C-Track automates tasks associated with today's intricate court processes. It's flexible, extensible, and allows for standards-based integration with other systems to provide a comprehensive workflow solution.

## **It's as reliable as it is powerful**

The reason 100 percent of our customers stay with us? Simple. C-Track works. That's why all installed courts are still using it. Our team of engineers and analysts continues to build and improve on an already superior product, and that makes C-Track the case management system you'll be able to rely on year after year.

## **Adapts to where your court is right now and where it'll be going**

C-Track is highly modular, giving your court the ability to change case management as your requirements change by adding new modules and functionality. And we're working on a range of new features and enhancements to make C-Track even more powerful, easier to use, and adaptable. Read more about our exciting C-Track enhancements on the back of this brochure.

# COMPREHENSIVE. CONFIGURABLE. CONSISTENT.

# A SOLUTION YOU CAN RELY ON FOR YEARS TO COME.

## **E-Filing. Electronic and easy to use**

C-Track e-filing creates an easy-to-use, streamlined electronic case filing process for both the filer and the court. As part of C-Track or as a stand-alone component, this system can integrate with any case/document management system and with third-party electronic payment systems to allow users to pay fees when e-filing.

Your court staff can use the e-filing review queues to accept or reject filings, and can add comments for the filer. Once e-filings are approved, the system automatically creates docket entries in the CMS with a link to the associated e-filed documents.

**Available as a stand-alone product.**

## **Public Access. Configurable and confidential**

Give your public appropriate access to court case information with our configurable, Web-based interface. People can search for publicly accessible case information by case number, attorney, or party. The results display case information that has been marked as public. Rules govern the transfer of case data and case documents to this system to prevent the release of confidential information.

**Available as a stand-alone product.**

*“After a thorough evaluation process, the solution Thomson Reuters presented was designed specifically for California’s Criminal case processing, including Judicial Council Forms. From the presentation, Sacramento was able to determine that their solution could best meet the Criminal needs for our court.”*

**Laurie M. Earl, Presiding Judge, Sacramento Superior Court**

# EXPERIENCE AND EXPERTISE TO SUPPORT YOUR TRIAL COURT.

## **More than 150 years of helping the bench and bar uphold the law**

Thomson Reuters is the leading provider of intelligent information and solutions to help meet the challenges of the nation's courts. Our rich history is the foundation for our specialized expertise and deep understanding of our customers.

More than 8,500 U.S. courts currently use our products and solutions, more than any other legal solutions provider. That's because we invest more time and resources than any other company in the justice and legal industry on software and solutions to help courts produce superior judicial outcomes in less time, with more efficiency and improved access to case information.

## **A skilled C-Track team, at your service**

Our C-Track implementation team has extensive experience in court process analysis, project management, employee training, data migration, and system integration for multiple court types, each presenting their own unique challenges.

## **Thomson Reuters Court Management Solutions**

A comprehensive suite of products to help you streamline the entire judicial process:

**C-Track** – Comprehensive, configurable, consistent way to track and manage cases

**Thomson Reuters Westlaw™** – Powerful research tool to help courts quickly understand the law.

**Drafting Assistant and West km®** – Create documents and accurately review them

**Thomson Reuters CLEAR® records resource** – Secure, effective way to retrieve information to help you investigate people and businesses.

# C-TRACK. INVESTING IN THE FUTURE NEEDS OF YOUR COURT.

## FOR USERS

### E-Filing Workflow

Supports easier ways to configure the e-filing workflow for the court staff and enables a variety of specific workflow configurations to handle the needs of your court. Specialized user modules support law firms and case delegation, along with pro se litigants.

### Advanced In-Court Processing

Judges, clerks, and judicial support staff can seamlessly manage the court, record hearing outcomes, and generate secure, electronic documentation of court orders. Supports technology such as touchscreen attendance tracking, dynamic sentencing capture, and automated form processing with electronic signatures.

### Judicial Dashboard

Supports a library of new configurable widgets specific to judges including relevant, actionable views into pending matters, documents, and caseload data.

### Full-Text Search

Enables court staff to search words or phrases against, within, or across electronic documents.

## FOR TECHNOLOGY STAFF

### Web Services Library

Our complete Web services library allows IT staff to compress implementation time and support current and new third-party justice partners without relying on the vendor.

### Ad Hoc Reporting Toolkit

This integrated report creation toolkit allows court staff to independently construct new custom reports on demand without relying on the vendor.

### Rules Engine Toolkit

An integrated workflow configuration solution that automates the execution of actions based on court-provided data. This toolkit will allow non-technical court and IT staff to manage business rules and data values.

### Configuration Manager

This integrated configuration utility allows non-technical court and IT staff to tailor code values and data look-up tables such as case types, docket entry types, and ticklers in a simple spreadsheet environment.
