Service Description
Azure Foundation Design & Build

Prepare the groundwork.

Whether you are deploying your first production application to Azure, or adding to a complex portfolio of existing workloads, Compugen will guide you through the Azure Landing Zone implementation options and tailor them to your requirements.

This service is designed to assist organizations with the most important step on the cloud adoption path – designing and building a strong foundation for the Azure environment

Choose the plan from the table below that best aligns with your requirements.

Working closely with your team we provide the following services:

- Environment design based on Microsoft reference architectures and deployed using Compugen built automation for a consistent and effective deployment
- Cloud Service Provider (CSP), Azure Tenant, and Directory provisioning
- Network, Security, and Governance policy configuration
- Azure AD, Backup and VPN core services integration

Deployment of the following in Azure	Basic	Premier*
Workload applicability	Test/POC	Any
