### **What we offer**

Our Azure Foundation offer aims to create the basic foundation (aka Landing Zone) of infrastructure, governance, security and services so you can start leveraging all of the possibilities that Azure has to offer. The setup is based on Microsoft Best Practices and as such gives you a good start for migration workloads into Azure or to start exploring Azure on your own.

Each Azure Foundation setup is different in terms of complexity, scale, cost and duration. We provide you with clear deliverables in each scenario. Different scenarios are possible, depending on your needs. We will help you at each step of your cloud journey, from the Assessment stage up to the handover to your Operations teams.

Pricing depends on complexity and duration of the project.
