

Technology Consulting Digital Transformation

We advise senior management on how to leverage Technology to increase revenues and create operational efficiency.

We accompany organization at every stage of their digital transformation journey.

Kitameraki is a boutique technology & operations consulting firm that provides unique solutions to companies throughout Southeast Asia.

Our team is passionate, curious, eager to learn, and motivated to share knowledge. For us, ensuring a company's future growth means always seeking what's best for our clients.

- We are passionate consultants & technology veterans
- We are pragmatic and implement value added solutions for any size of project.
- Reaching highest standards using a qualitative approach is part of our DNA.
- Our objective is setting the industry standards, positioning us as category leaders in the region.

kita: Indonesian (pronoun plural) We, People

meraki: Greek word which means to do something with soul, creativity, or love; to put something of yourself into your work.

Advisory & Consulting

Working with an experienced partner is extremely important when aligning your plan with your business strategy and using the right resources to stay ahead of the competition. Our senior consultant team has a strong understanding of the rapidly evolving challenges companies are facing.

Board Advisory

We assist C-Level and Senior management develop a technology strategy and roadmap that aligns with and supports their key business priorities. Ensure that IT is able to act as a key enabler for business value.

IT Assessment

We undertake IT maturity assessments across all elements of the IT function. We review how business alignment, strategy, architecture, development and operations are currently being run, and seek to understand issues with capability, process and governance. We conclude our assignment with a set of recommendations and next steps.

Enterprise Architecture

We help you holistically design people, processes, and technology to maximize company scalability and performance.

Cybersecurity

No company can afford a breach that could block the entire organization. Our Cybersecurity professionals find security gaps & misconfiguration, assess your risk exposure, determine what requires your immediate attention and which action is most appropriate.

Solution & Vendor Selection

Our senior consultant will support you through the sourcing and selection process of different vendor capabilities & solution propositions and develop recommendations.

Implementation

Management of projects and programs has been in our DNA for decades. With hundreds of successful projects completed on time and within budget, our certified project managers are confident about meeting your requirements.

Business Applications

We have experience with implementing Business Applications such as ERP, CRM, Warehouse Management Systems, Point of Sales Systems, Hospital Information Systems, to name just a few.

Project & Program Delivery

As your project implementation partner, we will support you at all phases, including scoping, requirements gathering, vendor / system selection, implementation, and transition.

Business Intelligence

With our data driven tools and strategy, you can make better business decisions. Through best practices, implemented and fine-tuned through many testing cycles, we ensure successful implementation and adoption.

Mobile / Web Development

Our team has the capability to build custom, scalable and powerful web and mobile applications across a wide range of technology stacks. While our creative team applies best practices of digital design, our technology team will deliver you a cross-platform solution, which further engages and excites your users. The web application development services we offer range from simple landing pages to complex custom solutions that help clients achieve their business goals.

Agile Process Improvement

As business requirements change, it becomes increasingly important to use process improvement programs that adapt to these changes to deliver more value to the organization. Our process improvement methodology is based on Agile software development principles such as: short iterations, involving the customers much more, and focusing on process improvement instead of making large process documentations.

People & Organization

Because the human resource is one of your most important assets, we help you strengthen this capital so you can get the most out of your investment. Whether it's for coaching sessions for individuals or teams, or for developing your organization, speak with a coach, HR consultant or interim executive today.

Interim Management

Every organization, regardless of their size, needs someone in charge. Interim Finance, Operations and Technology executives are available to help drive your business, long-term or short-term.

Organization Efficiency

What can be done to make your organization achieve greater effectiveness? Our team of experts can help you answer this question and foster employee growth using a variety of tools such as workshops, skills development, mentoring, training, and more.

Coaching for Executives

Although executives and managers are key influencers within their organizations, they rarely receive ongoing feedback or have a chance to discuss challenges and opportunities. We will use a 1:1 session primarily to develop a developmental plan that will lead to positive behavior change.

IT Staff Augmentation

Leverage our IT staff augmentation services and add extra talents to your project on an on-demand basis. Access IT professionals, including skilled technical lead, software developers, business analysts, project managers, QA specialists.

Our broad experience make us confident that we can solve problems that are unique to you.

We have experience working with organizations from different industries, sizes and technological environments:

We support businesses in a variety of industries

-  eCommerce & Retail
-  Automotive
-  Banking
-  Food & Beverage
-  Telecom
