

### Who we are

Piksel are a team of technology lovers, continually keeping abreast of industry trends ensuring that our customers benefit from our experience, extensive knowledge and leading after sales service.

We are seen as an extension of our customers IT team, providing solutions to keep their organisations running 24 /7, 365 days a year.

No one size fits all, we provide our customers with a flexible best fit solution that matches their demands.

### Cloud technology leaders

Piksel leverages a strong tradition of delivering enterprise class professional and managed services and applies these tried and tested principles to providing services in the cloud.

Piksel developed its own private cloud offering in 2008 and has been working with public cloud services since 2009.

By combining our in house teams skills along with the support of our extensive partner network Piksel provide end to end consultancy and solution delivery.

### Who we work with

We are a Microsoft Gold partner who specialise in deploying and migrating workloads and services to Azure public cloud and we are a **Microsoft Cloud Solutions Provider (CSP)**.

From license provision to full implementation of Office 365 productivity tools, our team has the knowledge and expertise to ensure our customers receive maximum benefit of the Office 365 suite.

### We take quality and security seriously

### Offices in Europe and the U.S
