

## CLOUD SOLUTIONS

# AZURE CLOUD SOLUTIONS

As a Microsoft Gold Cloud Productivity and Platform Partner, Sirius helps companies manage, migrate and secure their Microsoft® Azure® environments with a proven methodology that leverages industry best practices to achieve their desired business outcomes. Together, Sirius and Microsoft provide clients a full-service life cycle of cloud offerings.

## THE SIRIUS CLOUD ADVANTAGE

Sirius is dedicated to helping clients successfully navigate their cloud and digital transformation journey with innovative offerings that leverage industry-leading tools from strategic vendors that make businesses more successful and agile. Our team of cloud experts go beyond the technology, also analyzing financial and operational impacts to set you up for success. Microsoft's Azure cloud computing platform provides services that allow for everything from running existing applications on virtual machines and exploring new software models, to managing physical assets so you can focus less on infrastructure and more on business operations. Azure's products and services span the cloud, are interoperable and open-source, and can be utilized at any scale to bring speed, flexibility and simplicity to your cloud strategy.

## WHY SIRIUS

With a dedicated Microsoft Azure team of certified cloud consultants and technologists, Sirius applies engaging, practical and proven methodologies to ensure that organizations achieve their cloud goals. Having deployed thousands of Azure workloads, we know how to help our clients get the most out of their Azure investments and improve the way companies securely develop and deliver Azure services.

### Sirius Microsoft Competencies:

- Gold Partner Program
- Gold Cloud Productivity
- Silver Portals and Collaboration
- Microsoft Advance Specialization in Azure SQL

## SIRIUS AND MICROSOFT AZURE CLOUD SERVICES

**Azure Landing Zone:** A configured environment with a standard set of secured cloud infrastructure, policies, best practices, guidelines and centrally managed services that enable application migrations and greenfield development at an enterprise scale in Azure.

**Storage Assessment:** With a proven methodology leveraging industry best practices, Sirius helps companies utilize the cloud for their data storage. Our Microsoft Storage Assessment helps clients understand their storage capacity and utilization to determine if Azure is the right choice to help achieve their desired business outcomes.

**End-User Computing (EUC):** Whether your end-users rely on desktops, laptops, thin clients, tablets or smartphones, making sure they have access to the tools and data they need to do their jobs is critical. Sirius can help with every aspect of your VDI strategy, including assessment and design services, proofs of concept and implementation.

**Azure Cloud Disaster Recovery and Backup:** Companies are faced with ongoing challenges when it comes to data backup and recovery. Whether their data is growing faster than they can keep up with it, they're looking to utilize the cloud for data storage, or operational costs are just too overwhelming, Sirius can help them determine the right data protection strategy. We assess your data capacity and utilization to identify potential risks, exposures and single point of failure.

**Inscope Anomaly:** Our business application helps you optimize your cloud by monitoring your Azure spend and providing alerts associated with cost anomalies before they hurt your pocket.

**Azure GlidePath:** Using a proven, time-tested methodology with over hundreds of successful migration projects, our Azure GlidePath services deliver Azure Readiness via a pre-migration assessment, Migration, and Governance services that are customized for your business.

**Azure Architecture Assessment:** Delivers definitive, clear and actionable recommendations aligned with your targeted business imperatives to ensure the next steps of your cloud journey are successfully accomplished. We conduct a thorough environment analysis by collecting data and metrics, conducting team interviews, defining workloads, and examining specific business challenges and requirements.

**Azure Security Assessment:** Provides security posture management and threat protection review for your hybrid cloud workloads.

**Azure Cloud Readiness Assessment, Migration and Managed Services:** Our team of cloud certified experts recognizes an enterprise's specific business environment, identifies data and applications that can benefit most by moving to the cloud, and builds a robust migration roadmap. From planning to execution and management, we work with you every step of the way to ensure a successful and efficient migration journey.

**Data and Advanced Analytics:** With Microsoft data and advanced analytics solutions, companies can deliver better experiences and make better decisions by analyzing massive amounts of data in real time. Sirius provides data and advanced analytics solutions across all deployment models, and full consultation services.

**Artificial Intelligence (AI), Machine Learning and Chatbots:** We help clients define and design the right Microsoft AI and ML solutions to best fit the needs of the business and improve workflow automation, prognosticate outcomes and provide advice. Bots, or conversational interfaces, help improve efficiency by eliminating manual processes that result in higher effort and cost, extend to new lines of business, and improve responsiveness, while shortening time-to-market.
