

Azure Synapse 2-weeks Implementation Service

ABOUT Azure Synapse Implementation Service:

One of the key problems of the business today is the volume of accumulated data, the weak speed of their analysis and the constant overload of the database.

Azure Synapse helps organizations to build modern data architecture that enables efficient work with massive data and getting profound insights.

Cloud Services helps organizations to modernize Datawarehouse with using of Azure Synapse, speed up data analysis and significantly optimize cost of ownership.

WHAT WE OFFER

Automated pre-migration data assessment
including assessment of on-premise DB, migration blockers, information issues, compatibility issues, migration scenario, risk assessment

Integration
data integration with data sources

Deployment and Migration
Data model will be redeployed in Azure Synapse
Pipeline of data updates will be migrated onto PAAS
Migration backlog

Technical support
Incident Management 24/7
SLA

WHAT OUR CUSTOMERS ARE SAYING

“We were searching for the solution to speed up the work of our current Datawarehouse and integrate it natively with Power BI. With the solution provided by Cloud Services we tested Synapse and modernized datawarehouse through Azure PAAS implementation. Got significant improvements of speed of calculations from hours to minutes! Also we got absolutely new way of working with data through Power bi integrated with Synapse .

– Yuriy Mikhayluk, Analytics Head at IDS Borjomi

Cloud Services

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

WHY AZURE

Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
