

## **OneView Inventory and Order Management**

### **Offer Title: OneView Inventory & Order Management**

High Level: Optimize and control omnichannel inventory while empowering stores to efficiently execute on order fulfillment

#### **Offer Detail:**

Create omnichannel synchronization with powerful Inventory and Order Management functions. OneView Inventory consumes live feeds of transactional data to track every buy and sell for instant access to the most accurate inventory balances — everywhere. Combined with OneView Order Management, each store has a simple and continuously updated view of order flow for store fulfillment from web orders. This powerful, omnichannel-first view ensures that your team can quickly see and manage orders from any source as well as locate, transfer, and ship items from anywhere.

See how instant access to the most accurate inventory data and streamlined store fulfillment positions you to extend digital engagement with our free trial.

**Offer Pricing:** Please contact us for information on the Proof of Concept program and pricing.
