# Solution Overview

Application modernization is the refactoring, re-purposing, or consolidation of legacy software programming to align it more closely with current business needs.

Application modernization services address the migration of legacy to new applications or platforms, including the integration of new functionality to provide the latest functions to the business. The first step to achieve this is the evaluate the assets of a business to determine the best way to migrate or modernize.

An Application Modernization Roadmap will then be built using the evaluation outcomes. It is important to keep in mind what the customer businesses strategic goals and desired outcomes are, to align the Application Modernization Roadmap and address the digital business strategy, technical architecture, IT people and the process maturity.

Modernization options include re-hosting, refactoring, rearchitecting, rebuilding and replacing. An in-depth analysis on the application architecture is needed to clarify which option should be selected

## Application Modernization Roadmap addresses the following:

The cloud is fast becoming the modern path to business growth, improved operational efficiency, increased agility, and more efficient resource use. It also offers a healthier equilibrium of operational and capital costs with more reliable and constantly updated security and compliance. It is safe to say that “Cloud is good for business”.

**Many companies with legacy systems/applications are held back due to several perceived barriers including:**

Application Modernization will extend the assessment done by by identifying potential App Modernization opportunities. Taking you on an App Modernization Journey. Facilitating and supporting you above and beyond lifting and shifting to the cloud.

*There by unleashing the Power of Microsoft Azure Cloud Services and ensuring Return on Investment.*

# CONTACT US

Incorporated in 2017, 4Sight is a JSE AltX (ticker: 4SI) listed, multi-national, diversified technology group. Our purpose is to leverage our extensive product and services portfolio, focused on 4IR technologies, people and data-focused solutions to design, develop, deploy and grow solutions for our partners (customers and vendors).

4Sight's business model enables its partners to take advantage of products and solutions within its group of companies, which will allow them to enjoy turnkey digital transformation solutions across industry verticals.

The company's mission is to empower our partners to future proof their businesses through digital transformation to make better and more informed decisions in the modern digital economy.
