# Cloud Direct®

Zero Trust
Discovery

With the introduction of flexible working, employees are now able to access company resources and apps from outside the corporate network on both personal and work devices. Thus, it's no longer sufficient to have rules and policies on your corporate firewalls alone. Our Zero Trust Discovery service helps you assess and understand your security maturity levels and how to align them with Microsoft's Zero Trust Architecture best practice.

Cybersecurity assessment

Work with Cloud Direct as we've got the closest possible relationship with Microsoft and access to cybersecurity assessment to paint a clear picture of security across your cloud and on-premises environment.

Identify your target state

Uncover your security pain points and establish your desired end state. Combining operational readiness and assessment data, a Zero Trust roadmap can be drawn up for a phased and managed approach.

Stakeholder walk-through

We'll walk you through the analysis requirements and proposed solution to understand the findings and recommendations and help inform a business decision on next steps.

Why Cloud Direct?

☑ Microsoft Azure Expert MSP partner (audited annually by Microsoft)

☑ CAF and Co-Sell ready Microsoft Partner

☑ Cloud first MSP - specialists in cloud solutions
