

Azure Migration Factory

Migrate at scale. Whether your environment has hundreds or thousands of images, Celsior Technologies™ can help you migrate to Azure. Minimize your risk with an experienced team and a cost-effective resource model.

You've invested in a solid strategy and plan. Your landing zone is deployed and ready for scale. Celsior can help you build upon that foundation and migrate your remaining compute and SQL images to Azure. Our team has migrated customer environments with hundreds and thousands of images to the cloud, with a resource model that is cost-effective. And for those apps that aren't migration-ready, we can help you determine your best next steps.

Assess & Plan

- ✓ Gather data and analyze assets and workloads
- ✓ Create a Cloud Adoption Plan backed by the Microsoft Cloud Adoption Framework

Ready

- ✓ Build a skills readiness plan
- ✓ Deploy a fully functional Azure landing zone in one region

Migrate

- ✓ Rehost your compute and SQL images to your landing zone at scale

Celsior Technologies meets our clients where they are in their Azure cloud journey, moving their digital projects further, focused, faster.
