

Azure financial management is an cloud governance discipline enabling you to balance performance demands, adoption pace, and cloud spend

Enable cloud budget control and transparency

Minimize cloud utilization losses

Identify cloud spend anomalies

Reduce overprovisioned cloud assets

post()

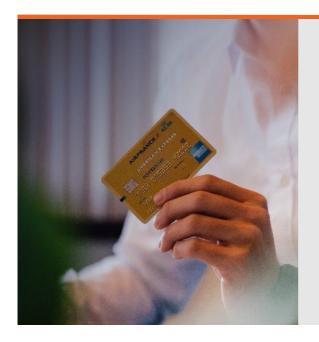

Challenges in enabling distributed DevOps teams to make the right trade-offs

Pay-as-you-go can detach the provisioning of cloud resources from financial accountability

Lack of insight and control of cloud spend

Traditional IT-budgeting based on CAPEX isn't working with public cloud

The solution is Azure financial management

What is Azure Cost Optimization

- A set of techniques. tools, policies and best practices to increase organizations ability to understand cloud costs and make the right business trade-offs
- Empowers organizations to identify and measure efficiency optimization
- Visibility into cloud spend and accountability within the organization
- Enables organizations to get maximum business value from cloud spend

Our four-step engagement method to enable continuous Azure financial management

INSIGHT

BUSINESS OUTCOME
