

Content Moderator by Sii

A smart way to improve your content quality

When you produce a written content within your organization, you can stumble upon some issues with the inappropriate wording or images. Most documents have to be reviewed multiple times before they are published any further.

About the product

Content Moderator, an application by Sii, is designed to address this kind of obstacles. Using both built-in mechanisms and Azure, this tool is able to automatically review documents and images, check them for any blocked elements and share the results, allowing you to create a high quality content.
