

Cloud Transformation of Traditional Data Center

Data center transformation process of organization's IT infrastructure

Data center transformation involves integrating cloud computing and virtualization to an existing data center. Transformation benefits from cloud computing and enables network virtualization, infrastructure security and other cloud computing features, such as scaling and elasticity in computing resources.

What is Cloud Transformation of Traditional Data Center?

Data center transformation is the process of changing an organization's IT infrastructure to improve its capabilities, performance and efficiency. This process may include data center migration, large-scale changes to hardware, adding virtualization and software-defined components, to automate business processes.

Why customers move to Cloud Transformation?

- Improved capability in computing resources
- Optimized performance and efficiency in resources
- Business automation
- Greater agility and reliability in computing resources
- Lower IT costs
- Flexibility and reduced delivery time in IT projects

Business Empowerment

- Business agility and efficiency
- Streamlined technologies
- Enhanced productivity

Operational Benefits

- Robust infrastructure strategy
- Simplified processes
- Managed services offering by ATCOM S.A.

Financial Benefits

- Flexibility for long-term success
- Reduction of Organizations CAPEX
- Multiple invoicing options (Reservations for 1Y – 3Y, monthly or yearly charges, Pay as you Go model)

ATCOM Cloud Transformation Assessment

Enterprise-grade capabilities

- Significant increase of scalability & productivity
- 50% average increase in operational performance
- Business & Operational Acceleration

Seamless transition

- Effortless implementation
- Increase in cloud transformation success
- Business Agility through Microsoft's products

Cloud Transformation of Traditional Data Center

Our promise to you

Azure cloud computing platform accelerates the delivery of applications and IT services.

An offer to get you started

- Get ATCOM Cloud Transformation Assessment **Free Of Charge**
- Contact info@atcom.gr to schedule the free cloud assessment
- Specialized Cloud Architects will offer professional consultation on your Organization needs

Why ATCOM?

ATCOM is the leading Digital Business Agency in Greece. The ideal strategic and technical partner in your cloud transformation journey. Using ATCOM's advanced Microsoft solutions, we deliver effective and measurable results across all Data Center services, establishing a customer-first business experience.

The ATCOM Cloud Services Unit offer proudly:

- Azure Cloud Services Certified Architects and Engineers
- 24x7 Blackbelt Support Engineering Team in Azure Cloud Ecosystem
- Microsoft Advanced Support, free of charge in all clients

ATCOM Cloud Services Unit is honored by holding several Microsoft awards:

- Microsoft Certified Gold Cloud Platform
- Microsoft Certified Silver Small & Midmarket Cloud Solutions
- Microsoft Direct Cloud Services Provider since 2016
- 2017 Microsoft Partner of the Year Award
- 2017 MS Summit Excellence in Cloud Sales Performance in Azure
- 2015 Microsoft Partner of the Year Award
