We want our customers see us as a reference in our sector and trust our work

Goals can only be achieved by building trust through work and dedication. Organizations can realize the strategic value of their teams and empower personal and professional growth by embracing digital solutions.

CHALLENGES

Modern businesses need to ensure that their customers' systems are efficient, economical, and environmentally friendly. To achieve this goal, they need the right digital transformation partner.

IDEAL SOLUTION

At Aleson ITC, we offer solutions that help businesses continue to grow via personalized, intuitive, scalable, high-impact digital services.

DESIRED OUTCOMES

Our senior team holds the latest Microsoft certifications, and we're always prepared to provide the services that your company deserves.

Windows Virtual Desktop

The Windows Virtual Desktop (WVD) app and desktop virtualization service runs on the cloud, enabling users to securely access their trusted applications so they can work anywhere.

1

Work remotely from anywhere

We configure your Windows Virtual Desktop infrastructure.

2

Growth-powering benefits

Take advantage of up-to-date security, cumulative cost savings, and increased resilience and compliance.

3

Access with no extra cost

If you employ Windows 10 or Microsoft 365, you can access WVD without incurring any additional costs.

Aleson ITC S.L., Windows Virtual Desktop, & Microsoft Azure

WVD on Microsoft Azure is a cloud-based desktop and app virtualization service. WVD works across devices—whether they're powered by Windows, Mac, iOS, Android, or Linux—to provide users with remote access to desktops and apps. WVD-hosted experiences can also be accessed via most modern browsers.

Facilitate remote access

Leverage remote access to your company's on-premises servers to unlock a more agile, secure, and productive way of working.

Increase security

If a device is stolen, nothing can be accessed from its local storage.

Install in data centers

When a cloud service provider's virtual desktop infrastructure (VDI) is used, desktops are hosted on servers located in secure data centers.

Customer success: We can work from anywhere and with any device

"Thanks to Aleson ITC, we've successfully implemented telework within our organization. We can now securely work by using our browsers, regardless of place or time."

First consultation

During a one-hour evaluation, the Aleson ITC team will analyze your organization's needs, users, and apps.

WVD prerequisites

To set up Windows Virtual Desktop, all you need is an active Microsoft Azure subscription.

Infrastructure delivery

We drive support, monitoring, construction, and deployment of your WVD infrastructure.

WVD: The modern way of working
