What's included?

Solidify has experts from all areas of the DevOps spectrum. Our specialists can help your team with anything from agile coaching to designing and implementing high availability Kubernetes clusters.

CHALLENGES

Do you have high performance teams that put too much time on your DevOps platform instead of development? Or do you want to get rid of supporting your DevOps platform to focus only on development?

METHODS

You will together with Solidify experts, on a 3 hour session, identify the scope of your DevOps As a Service needs and how we at Solidify could help you implement the best solution.

DESIRED OUTCOMES

Clear picture of where and how Solidify could help your organization achieve software excellence.

Benefits & Impacts

We'll help you resolve common issues with flexibility, life cycle management, control, and other production aspects through various DevOps engineering practices.

1

Experienced

Our Solidify expert consultants know what it takes to go from inefficient environment maintenance to a powerful and flexible industrial process.

2

Optimize

To achieve software excellence, your team needs to work on areas where their core competencies are, while a team from Solidify takes care of the rest.

3

Progress

Empowering teams and individuals and provide stimuli to drive for consistent improvements.
