Why consider migration to **Azure Virtual Desktop?**

Infrastructure Benefits

- Windows 10 experience at multi-session cost
- Cost effective compute and storage
- Flexible network provisioning
- Best value compute rate
- Opex spend aligned to business usage

Licensing benefits

- AVD management service included with the licenses you already own
- Savings on RDS CAL with multi-session deployment
- 3-year Win7 ESU included

Cut down on Labour

- Lower labor cost because compute and storage move to cloud
- Lower labor cost when you use PaaS services

Enhanced security

- Keep your applications and data secure and compliant with security capabilities
- Proactively detect threats and take remedial action

Hexaware's **AMAZE® for Virtual Desktop**

amaze®

- Combines the **best of breed virtual desktop solutions** to cater to every customer need

- Provides seamless **enterprise integration, enhanced zero trust security** & integration with enterprise active directory for **SSO capability**

- Flexible **subscription-based pricing model** to scale to the business requirements

- Enables the **Anywhere Employee** with hassle-free access from any end point device or network

Hexaware Commitment

Faster
- Automated Control Plane configuration
- Prebuilt library of images and machine sizes
- In built accelerators resulting in 70% automation
- 35% Reduction in implementation time

Better
- Repeatable implementation framework
- Delivers consistent service quality and savings
- SLA backed service delivery

Cheaper
- Flexible licensing structure enabling BYOL
- 50% - 60% savings in your landscape TCO
- Post migration support & optimization

Hexaware Differentiators

Microsoft Advanced Specialization for Azure Virtual Desktop
- Hexaware holds the advanced specialization by virtue of demonstration of deep knowledge, extensive experience, and proven successful deployments

IP CO-sell Ready & CAF Enabled
- Implementing best practices, well-defined frameworks, policies, blueprints, and guidelines

Azure Expert MSP & AMP
- Access to ECIF funding through Microsoft AMP and other programs

> *Hexaware's Migration service for Windows Virtual Desktop platform offered Inland an accelerated, automation driven migration that accelerated Business functions and provided our employees the ability to work seamlessly from anywhere, using any device, and any network. This allowed us to transition from an office environment to a work from home environment very quickly at the beginning of the COVID-19 pandemic with no interruption to the business. This also helped us leverage the best of Microsoft 365 Apps for enterprise experience, with multi-session virtual desktop scenarios providing the most productive virtualized experience. By providing a solution that had automation as the backbone, Hexaware was able to take the guesswork out of the equation and saved migration time as compared to a manual migration. With the built-in intelligent security features, we could keep our applications and data secure and compliant along with proactively detecting threats and take remedial action.*
