

Velocity Desktop

Your desktop, everywhere

Velocity Desktop

DEPLOY AND SCALE IN MINUTES

- ❖ Create or Migrate your Remote Desktop environment in minutes
- ❖ Access your desktop from any device

MIGRATE WINDOWS SERVER DESKTOPS AND APPS

- ❖ Bring your existing line of business apps with you to the cloud

ENABLE OPTIMISATIONS FOR OFFICE 365 PROPLUS

- ❖ Utilise unique FSLogix technologies to deliver the best Office 365 ProPlus experience for your users

Velocity Desktop, powered by Windows Virtual Desktop in Azure, provides your users with the only multi-session Windows 10 Desktop, virtualised in the cloud.

Highly scalable, always up to date and available on any device, Velocity Desktop delivers the best Windows 10 and Office 365 ProPlus experience to provide the most productive virtualised experience for you and your users.

Backed by our Velocity Support & Managed Cloud wrapper, Velocity Desktop makes moving to the cloud easy and cost effective, with security and peace of mind built in.

Why YOU should move to Velocity Desktop

SECURITY & REGULATION

- ❖ Government
- ❖ Financial Services
- ❖ Healthcare

REMOTE WORKING & ELASTIC WORKFORCE

- ❖ Remote Working & Learning
- ❖ Short Term Employees
- ❖ Contractor & Partner Access
- ❖ Mergers & Acquisitions

SPECIALISED ROLES

- ❖ Mobile & Firstline Workers
- ❖ Call Centres
- ❖ Branch / Kiosk Workers

INTENSIVE WORKLOADS

- ❖ Design & Engineering
- ❖ Software Development & Testing
- ❖ Legacy Application Requirements

Colchester Borough Council

Colchester’s Digital Transformation Revolutionises its IT Infrastructure and Service Delivery and Lays Strong Foundations to Embrace Future Technologies

“Sol-Tec was a breath of fresh air. Straightforward and capable, Sol-Tec got the job done right, first time, saving us time and money...When they need to go the extra mile for us, they do so without hesitation. Long may the partnership continue”

Kieran Johnston,
Strategic ICT Communications Manager

In January 2016, [Colchester Borough Council](#) adopted an innovative IT strategy it named [Technology 2018](#), designed to take advantage of the new technologies that were now part of many people’s everyday lives.

The Council had followed a steady pace of technology change over the previous decade, but the speed and performance of their virtual desktops no longer matched the expectations of existing staff, let alone the digital natives joining the workforce. It was no longer about doing what was sensible for the IT department. It was time for IT to enable transformation at the front line and across the organisation. With 1,500 staff delivering dozens of different services across several locations, that was no small ambition.

Sol-Tec and Colchester took less than a day to create the outline plan to tackle this, focusing on wholesale migration of remaining servers to Azure and building a Windows 10 remote desktop running out of Azure for those legacy systems that required installed clients

Colchester was able to take a measured and effective approach to Azure migration and Windows 10 desktop rollout, ensuring they could pace the delivery appropriately to their significant staff numbers across a diverse set of services.

As Colchester identifies and prioritises the next stage of its technology journey, the organisation is embracing and exploiting the technology delivered so far. Colchester believes and has seen first-hand that the team at Sol-Tec delivers effectively and in Colchester’s best interests. Sol-Tec understands Colchester’s needs, aspirations and is proud to support its public service delivery.

The Details

- Simplified, centralised and unified management and deployment experience
- Migrate your existing Remote Desktop Environment to Azure in minutes
- Optimise your cloud experience while lowering costs for your Windows Server desktops and apps
- Get all the tools and resources you need to migrate your apps, data, and infrastructure at your own pace, with confidence
- Get free extended security updates for your Windows 7 Virtual Desktops, allowing you to transition to Windows 10 at a pace that is right for you while securing your legacy environment
- Bring your existing licences to Velocity Desktop - Access desktops powered by Windows Server Remote Desktop Services at no additional cost if you're an eligible Microsoft Remote Desktop Services (RDS) Client Access License (CAL) customer
- You pay only for the set up and the Azure compute, storage and networking associated with the virtual machines that you use in your environment
