

# Microsoft 365 Crash Course

## Extract More Value from Your Microsoft 365 Investment

With over 80 products, services, and security capabilities included in your Microsoft environment, it's daunting to maintain a firm grasp of everything you own and how you can be using it. Yet with increasing demands on IT, it's never been more important to do so.

## Introducing the Microsoft 365 Crash Course

To ensure businesses get the most out of their Microsoft 365 subscriptions, Crossfuzze has developed a customized, two-day "crash course" workshop that will empower you to start making informed, strategic decisions about the future of your Microsoft cloud environment.

### Crossfuzze's industry-leading Microsoft 365 Crash Course includes:

- ▶ A personalized "discovery phase" of your operating environment, including all of the relevant third-party apps you're using
  - ▶ An interactive and collaborative two-day workshop in which leaders from across your organization will explore all of the Microsoft 365 offerings relevant to them
  - ▶ An analysis of which of your third-party apps are duplicative of similar Microsoft 365 services
  - ▶ An expert assessment of the Microsoft 365 features you should consider implementing to enhance and secure your operating environment
- ▶ Development of a roadmap that lays out your Microsoft 365 launch strategy, including both training and technical considerations

### Upon completion of this two-day intensive workshop, you will have:

- ▶ A firm grasp of which Microsoft 365 offerings makes sense for your organization
- ▶ An optimized implementation roadmap aligned with your business needs and culture
- ▶ Insight on how to implement and activate valuable, next-generation Microsoft components already included in your license
- ▶ Security posture against known and unknown cyberthreats
- ▶ Redundant subscriptions for third-party apps and areas to reduce costs

BRANDS  
**SELF ESTEEM.**

*“My team raved about this after the fact. Everyone had multiple takeaways from this course.”*

## Tailored to Your Organization

The Microsoft 365 Crash Course is not end-user software training or tips and tricks. It's a high-level, strategic look at the powerful functionalities available to you through your Microsoft 365 subscription that make the most sense for your needs and business objectives.

Invite representatives from across your organization to your two-day Crash Course. Every business unit in your organization will benefit from learning how to unlock the Microsoft 365 features that will drive value in their line of work.

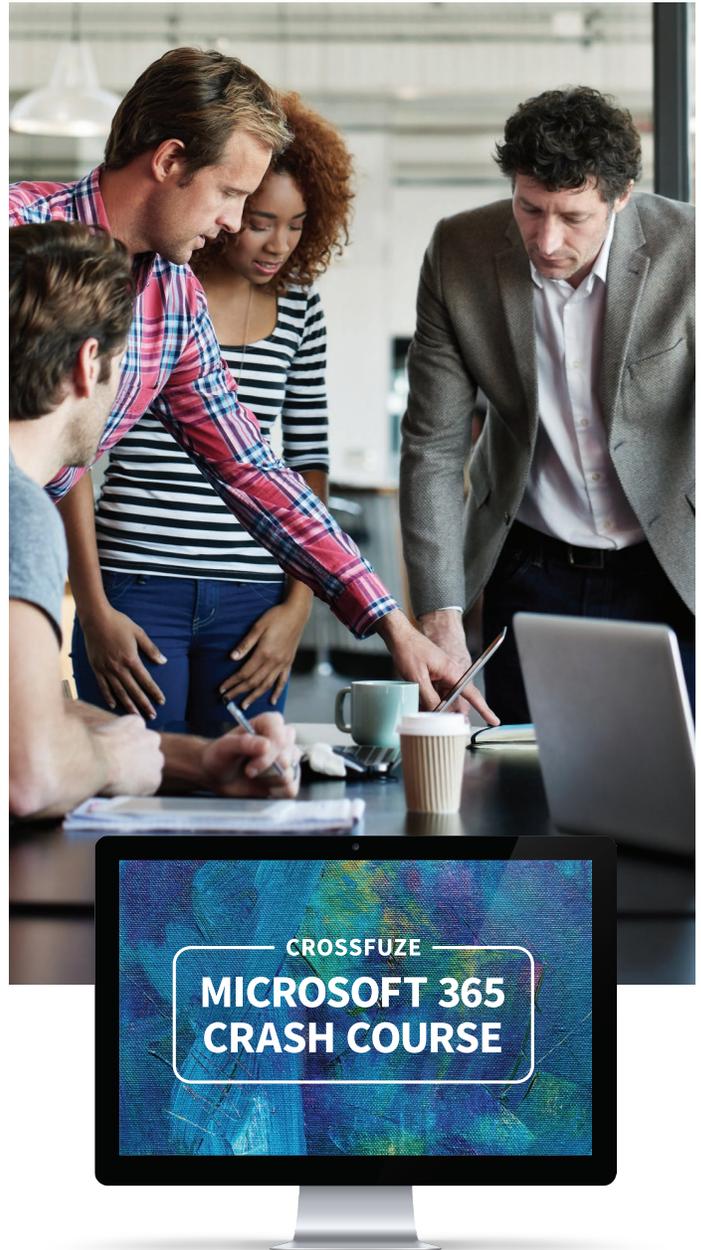

## Created by Experts

The Microsoft 365 Crash Course was developed and is led by a Microsoft-certified Crossfuzer team with unique expertise in implementing the full suite of Microsoft 365 features. Our team is proud to hold nine Gold-level Microsoft competencies. And we're proud to be working directly with Microsoft to bring our unique, customized offering to more organizations every day.

## Eliminate Redundancy, Save Money

The Microsoft 365 Crash Course will help you evaluate the common third-party apps you're currently using, so you can decide if you should switch to the comparable Microsoft 365 offering. For example:

IF YOU USE:		YOU COULD USE THIS INSTEAD:
Webex or Jabber	>	Microsoft Teams
Box or Dropbox	>	Microsoft OneDrive for Business
Tableau	>	Microsoft Power BI

Crossfuzer™ is a preferred Microsoft Gold Cloud Partner with expertise across the Microsoft 365 portfolio of services and tools. As specialists in offerings like Azure, SCCM, and the Microsoft 365 suite, we've helped hundreds of customers maximize their productivity, efficiency, and security in the cloud.
