

Microsoft 365 Security CrashCourse Workshop with Zero Trust Assessment

Virteva's Microsoft 365 security experts are adept at helping showcase to your organization the full breadth of security features, capabilities, and outputs available in Microsoft 365, along with performing advanced analysis and specific recommendations related to attaining an effective Zero Trust state to help your organization thrive.

Combining Education With Action

"I loved that the [Virteva M365 Security CrashCourse with Zero Trust Assessment] allowed my team to both gain an understanding of what security tools we had access to in M365, along with 'making it real' for us by assessing our Zero Trust state and giving us transparent, actionable, and realistic goals to enhance our company's security. We are now much more confident about the journey ahead!"

COO, Global Professional Services Firm

WHAT WE OFFER

Get the most from Microsoft 365 with our Security CrashCourse Workshop + Zero Trust assessment.

As the Microsoft 365 security suite continues to expand, it's critical for every organization that has adopted, or is considering adopting, the platform to adapt their understanding along the way and ensure that they're getting the greatest value from the vast array of tools available in the Microsoft 365 suite.

We lead two half-days of intensive overviews focused on the key security capabilities of Microsoft 365. We also review and analyze your current environment's alignment with the Zero Trust security model and provide recommendations for optimizing your investment.

Through a combination of presentations, interactive dialog, use of real-world examples and demos, and assessment activities, Virteva ensures that you come away with confidence in your approach to security through Microsoft 365. You'll discover how to most effectively apply these lessons holistically in the best way for your organization.

Putting M365 Security Tools Into Perspective

What is it?

- Get a deep dive into the security features available throughout the Microsoft 365 suite, presented by Virteva's Microsoft 365 security experts,
- Gain understanding of the value, realities, and best practices associated with each of the Microsoft 365 security components.
- An analysis of your current environment as it relates to alignment with the industry-standard Zero Trust security model, delivered by practitioners who deploy and manage Microsoft 365 security environments every day
- Receive recommendations specific to your organization's unique security needs and goals

Why is it important?

In the way the world has evolved, particularly recently, it's more important than ever for organizations to enhance their security while simultaneously accommodating a hybrid workforce, hybrid device ecosystem, and ensuring that users are empowered to do their work in the most efficient and effective way possible. As Microsoft 365 has evolved, the security capabilities within it have continued to expand to address many of the critical security layers every company must address. To effectively leverage these array of advanced security services, it's necessary to not only understand each of them and how they work, but also to properly evaluate how best to apply them, ensuring both protection and end user experience are prioritized. Virteva combines our world-class M365 security workshop with an assessment focused on helping your IT and security teams combine their newfound understanding of the full M365 security suite with actionable and practical roadmaps to gain the most effective alignment with Zero Trust possible.

Created by Experts

The Virteva Microsoft 365 Security CrashCourse with Zero Trust Assessment was developed and is led by a Microsoft-certified Virteva team with unique expertise in implementing and managing the full suite of Microsoft 365 security tools and features. As a leading Microsoft Cloud partner, Virteva has conducted hundreds of Microsoft security-related implementations. We're excited to deliver this carefully crafted and unique Workshop with Zero Trust Assessment to all organizations who want to get the most from their investment while also ensuring they approach their security strategy with M365 in the most effective way for their own organization's specific needs.

Virteva is a preferred Microsoft Gold Cloud Partner with expertise across the Microsoft 365 portfolio of services and tools. As specialists in the full Microsoft 365 stack across both Consulting and Managed Services operations, we've helped hundreds of customers maximize their productivity, efficiency, and security in the Cloud.

WWW.VIRTEVA.COM

Clarity + Action

Interactive

A collaborative two-half-day workshop that educates your team on all Microsoft 365 security tools while also enabling interaction and demos to help solidify your team's understanding and gain confidence in how best to apply them.

Discovery

A personalized examination and assessment of your existing IT environment by Virteva to enable an overview of your Zero Trust model attainment.

Analyze

An analysis of your Zero Trust model attainment state with prescriptive and actionable recommendations to prioritize the most effective path forward with M365 security tools to enhance your Zero Trust state.

Roadmapping

Development of a prioritization roadmap combining the CrashCourse's results with the Zero Trust Assessment's results to formulate a plan that's tailored to your specific needs, goals, and business focus.
