

# Azure Integration Services

## 5-DAY PROOF OF CONCEPT

At Integration.team we believe in the power of Microsoft Azure. We connect our customers applications, processes, tools and devices, both on-premise and in the cloud with maximum efficiency and visibility in mind.

The consistently growing range of cloud services in Microsoft Azure offers a wide range of advantages and possibilities. At Integration.team we help our customers with their journey in and towards Azure using Azure Integration Service.

Using a phased approach, we will evaluate your integration requirements with an in-depth focus on one particular integration scenario of your organization. We will implement the selected use-case using Azure Integration Services in your Azure environment, allowing you to evaluate the functionalities & usability of Azure Integration Services within your organization.

### Scoping

- Stakeholder workshop
- Use case selection
- Environment prerequisites validation

### Implementation

- Azure provisioning and configuration
- Use-case development & implementation

### Delivery

- Handover
- Demo
- POC Results
- Next steps
