

# Accelerate your digital journey with Cluster Reply and Azure DevOps

## ABOUT CLUSTER REPLY:

Cluster Reply, an Italy-based Reply network company, specializes in consulting and systems integration services driven by Microsoft technologies. We're eager to innovate and help our customers in their digital transformation journey.

### *Discover the advantages of DevOps*

The advantages of our approach include collaboration and trust; shared responsibility; continuous learning and adaptation; lean thinking and waste reduction; measurable outcomes; and balanced alignment and autonomy.

## WHAT WE OFFER

We enable the modernization of our customers' applications through DevOps governance and infrastructure as code (IaC) deployment, helping them adopt new and innovative automation processes.

By implementing a DevOps approach, customers can set up Azure DevOps for faster delivery and higher product quality, with fewer incidents and reduced mean time to recovery.

The IaC method allows customers to deploy and configure their cloud environment in a descriptive mode.

Our DevOps engineers are experienced and certified in AZ-400 and Professional Scrum Master (PSM), ensuring that each aspect of the Azure DevOps platform configuration is addressed. These include user access management, design and implementation of continuous integration, testing, security, delivery pipelines, and more.

# Why Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

**Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.**
