

Data Pipelines Analysis and Assessment

ABOUT ATMOSERA'S DATA PIPELINES ASSESSMENT:

Atmosera is offering a complementary data pipelines assessment through a discovery session to look at the current application uses of your data as well as data sources to propose an Azure-based data management strategy.

WHAT WE OFFER

Data is the lifeblood of any business and ensuring that relevant data is captured and stored properly is critical to operationalize it.

Atmosera has the experience to help guide and implement a data strategy that is right for the business task. From inventory management to IoT, we have you covered. Atmosera will provide a discovery session to look at the current application uses of the data as well as the data sources and propose a strategy to leverage resources in Azure to streamline both collection, use, and retention of data.

Ensuring that relevant data is captured and stored properly is critical in allowing customers to operationalize it. Collecting data from disparate sources for ETL processes can be difficult to configure and manage, and migrating these processes to a cloud-native solution can be daunting. Atmosera has the experience and expertise to migrate ETL workloads into Azure to take advantage of robust cloud technologies such as Data Factory and Data Lake.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
