Hexaware's Amaze™ for Infrastructure Platform

Hexaware's **Amaze™ for Infrastructure** Platform is a natively built **automated and touchless** platform to Discover, Assess and Migrate in a Lift and Shift approach fine-tuned for various workloads

Automated Assessment & Sizing Plan

- Quick turnaround of assessment in 1 business day

- Detailed readiness report and sizing plan

- Extensive automation of upto **85%** at the assessment stage

Seamless Migration to Azure

- Automated migration execution leading to faster movement to cloud through ~**95% automation**

- Elimination of migration defects and cost savings of upto **30-60%**

- Real-time status of migration & ETA

Automated Cloud Management & Support

- Single pane of control & visibility

- Unified cloud management platform for automated provisioning & orchestration

- Interactive dashboards for optimization of cost & performance

Migration Methodology

Collect	**Discover**	**Assess & Plan**	**Migrate**
• We collect information form the customer pertaining to on-premise infra credentials & Azure Subscription	• We use the credentials provided to connect to the on-premise infra and discover the workloads	• We run our assessment tool to identify cloud readiness of VMs as well as a sizing plan with detailed Azure cost break-up	• Based on the customer's decision, we can create the landing zone using APIs and complete the replication of VM

➢ **The entire migration process is orchestrated and managed by Hexaware's Platform with built in fault tolerance, notification management & error handling**

➢ **Hexaware's migration methodology is aligned with Microsoft Cloud Adoption Framework and is based on the best practices recommended by Microsoft Azure**
