

GUIDEWIRE ON AZURE

GUIDEWIRE ON AZURE: BRING CLOUD-NATIVE TO YOUR GUIDEWIRE DEPLOYMENT

WHAT WE OFFER

Our offer is focused on migrating containerized Guidewire Insurance Suite onto Azure Cloud. As part of this, we setup the necessary underlying Azure environment, which is comprised of AKS, Key Vault, VNET, etc. We utilize a set of accelerators and reusable resources, that may be customized to meet various customer requirements.

Benefits:

- **Cloud-native:** Our solution uses Terraform IaC to provision the underlying Azure infrastructure. The Guidewire Insurance suite applications run on a secured, best-practice Azure Kubernetes Cluster. Supported scenario is Guidewire portability to other Kubernetes environments, enabling for hybrid and multi-cloud scenarios.
- **DevOps:** Fully automated deployments via CI/CD pipelines. This enables organizations to easily adopt fully deployed Guidewire stack in Azure.
- **Secure:** The solution follows best practice Azure and Kubernetes configuration. Additionally, it integrates with Azure AD for administrative and service AAA. Traffic is encrypted at rest and in transit. Additionally, sensitive secrets are stored in Azure KeyVault. SWIFT, PCI-DSS and other regulatory compliance.
- **Flexible and Scalable:** Running Guidewire in containers enables fast boot times and elasticity. Combined with Service Mesh it further secures the application stack and allows for various deployment strategies.
- **Resilient:** Kubernetes delivers built-in high availability and reliability. Combined with Azure Availability Zones, this enables for graceful response to unexpected failures by shifting workloads away from failed systems.
- **Integrated:** Our accelerators can be easily integrated into existing Azure Landing Zones and environments. Additionally, our team is working on further enhancements to integrate Guidewire Insurance Suite with other Azure products and Services.
- **Expertise:** Our Azure and Guidewire teams are available for further configuration, management and support of the Infrastructure, CI/CD pipelines and the Insurance Application Suite.

WHY MICROSOFT AZURE?

Be future-ready

- Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.
- Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

- On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.
- Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

- You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.
- We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

- Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.
- With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
