

Legal Business Solutions: Cloud for Legal

Get more value out of your law department with PwC's Cloud for Legal on Microsoft

Cloud for Legal is a first-of-its-kind **industry cloud built for legal** that combines PwC's legal industry capabilities, services, and technology experience with Microsoft's state-of-the-art cloud solutions. PwC's Cloud for Legal is **powered by Microsoft Azure, Data Lake Storage, Cognitive Services, Power BI, and Power Platform**. Using Microsoft tools and PwC's proprietary solutions as its foundation, we **help your company's law department work more effectively, efficiently and strategically** by helping to make sure your legal function has the appropriate systems and processes in place for your specific needs and goals - today and into the future.

With Cloud for Legal you get a **trusted advisor** with experience to work with you side-by-side to analyze and assess your department's business and tech needs. We then recommend the most appropriate legal technology solutions for your business, **connect and configure systems and deploy innovative legal technologies**, including a legal data lake, intelligent automation, and AI-powered legal solutions, all of which are built on Microsoft's platform, to **help you extract even more value from your existing technology investments and your law department's operations**.

Benefits

1

Automate repetitive, high-volume tasks and workflows, monitor performance, and identify improvements with flexible solutions that work with and across existing legal applications

2

Uncover, analyze, and act on insights hidden within documents and disparate systems using legal natural language processing (NLP) that understands your work

3

Visualize information and drive decisions from analytics built upon a legal data lake that unifies diverse legal systems and brings structured and unstructured data together in real-time

4

Extract increased value out of your law department by improving processes and technologies

Legal Business Solutions: Cloud for Legal

Our Services

Legal NLP

Identify, extract, and understand legal terminology within documents, systems, and requests from business and 3rd party stakeholders

Legal Data Lake & Analytics

Combine, normalize, enhance, and analyze structured and unstructured data from disparate systems. Drive decisions from data insights

Legal Automation

Augment and eliminate manual legal tasks with configurable workflows, integrations, and user and application-friendly interfaces

LegalTech Optimization

Implementation, configuration, and integration of industry leading legal technologies

Use case

Augmenting Contract Management with Legal NLP

CHALLENGE

Even with the contract lifecycle management (CLM) systems in place, our clients often struggle to understand key provisions across thousands of contracts quickly, which are critical for making strategic decisions in challenging environments.

SOLUTION

With coverage of contract experienced professionals across a range of agreements, PwC supports contract migration, contract review, and contract analysis needs through data acquisition, extraction, and visualization.

RESULTS

Our technology-enabled approach leads to over 6x faster contract review than existing alternatives, unlocking key data to enable law departments to act on contracted relationships and allows client IT teams to leverage their existing investments without having to implement new systems.
