Azure Pathway

What is Azure Pathway?

Azure Pathway from Servent helps simplify your journey to the Microsoft Azure cloud. This journey will be a disruptive, but this is where Azure Pathway can assist with the migration challenges presented.

Servent understand the complexity of cloud migration. With **Azure Pathway** we lessen your migration pain points as well as being able to help you realise the benefits of moving to the cloud.

Solution

Azure Pathway is a framework for migration to Azure. With **Azure Pathway** we accelerate your Azure migration with step-by-step guidance and technical resources that are customised for your workloads. We use a selection of tools and solutions to help meet your specific needs, regardless of where you are in your cloud migration journey.

Benefits

- Detailed discovery and assessment of applications and infrastructure, and their suitability for cloud migration.
- Seamless migration of workloads to Azure.
- Insight and guidance around utilisation and optimisation of cloud services.

The **Journey to a Modern Enterprise** is our proven approach to moving customers to Azure. **Azure Pathway** is an offering which is part of this approach, built from many years' experience of moving customers to the cloud.

Azure Pathway from Servent provides a flexible framework for transitioning and migrating applications, data and workloads to the cloud whilst at the same time identifying opportunities for transformation and optimisation.

With **Azure Pathway** we adopt a three-phase approach for migrating to the Microsoft Azure cloud, as shown below.

Assessment – identify candidate applications and infrastructure which would benefit from migration to the cloud.

Migration – we use tools to automate the deployment of apps and infrastructure to the cloud in a controlled, managed manner.

Operations – migration to the cloud is just the beginning of your journey. We help with ongoing monitoring, cost management & training.

Our proven approach has been developed and enhanced after helping many customers – from small organisations to the largest enterprises – with their migration to Azure.

We fully understand that migration to the cloud is not always straightforward. It will be disruptive. It can be difficult. It will be challenging. We like to think we have all the answers to help make this journey a less daunting task.

Read on to understand how **Azure Pathway** can help you achieve a seamless, friction-free cloud **Journey to a Modern Enterprise.**

Azure Pathway simplifies cloud migration journey by creating a framework for assessment, migration and operational activities.

Application & Server Assessment

Servent will undertake an in-depth assessment of your existing on-premises infrastructure and applications. As part of this assessment we will identify suitable infrastructure and applications as candidates for migration to Azure.

This includes analysis of workloads that would benefit from migration to PaaS, as well as considering server rightsizing opportunities to minimise cloud spend. We will also highlight any system dependencies so that you can be sure that you have complete understanding of your entire environment.

Grouping & Prioritisation

Understanding how and when to migrate applications is key. As part of our assessment we can group and prioritise applications that can be migrated together along with determining any resources required on the cloud platform to support these applications.

Consuming Cloud Services

Organisations can benefit from the adoption of PaaS services. We identify the best PaaS offerings for your workloads to ensure you are getting best value from the platform.

Tool Selection

Selecting the right tools is key to the success of any cloud migration. With our expert knowledge, we ensure that the right tooling is deployed to allow us to efficiently and securely migrate your workloads and services to the cloud.

Cloud Cost & Optimisation

Unnecessary cloud spend happens across many organisations. We always ensure that customers make the right decisions when it comes to cloud consumption. We present relevant information to help you manage and forecast cloud expenditure.

Config Management & DevOps Automation

We help you make the most of Azure by introducing tools and processes that promote smarter working, such as configuration management, DevOps and automation capabilities available on the cloud platform.

Training & Knowledge Transfer

The benefits of consuming cloud services will only be realised if the those supporting the platform are sufficiently skilled. We will work with you to ensure that you have the right blend of knowledge and skills to support your **Journey to a Modern Enterprise**.
