

# ADvantage Migrate

Revamp the data and analytics landscape with HCL's one-stop solution

## About the solution:

HCL's ADvantage Migrate is a one-stop solution that helps enterprises modernize their entire data and analytics landscape. The solution assists in unified analytics and governance, amplified human output, and faster business outcomes by leveraging the following key components:

1. **HCL Deep Data Expertise:** Our experience and expertise in data engineering, and cloud along with our proprietary methodologies and architecture principles to embed standardization in the modernization process.
2. **Three Step Automation Process with Pre-Engineered Products:**
  - a. **Gateway Suite:** Discover, analyze, and auto-convert legacy codes and database schemas to embed automation in the modernization process.
  - b. **Sketch:** Modernize the data pipelines and migrate data using platform-agnostic configuration driven data processing
  - c. **Gatekeeper:** Achieve zero-touch automated data reconciliation and continuous testing post-migration

### Technologies supported

- All technologies\* including:
  - IBM DB2, Data Stage, Netezza, Cognos
  - Teradata
  - Hadoop
  - Informatica
  - Oracle
  - SAP

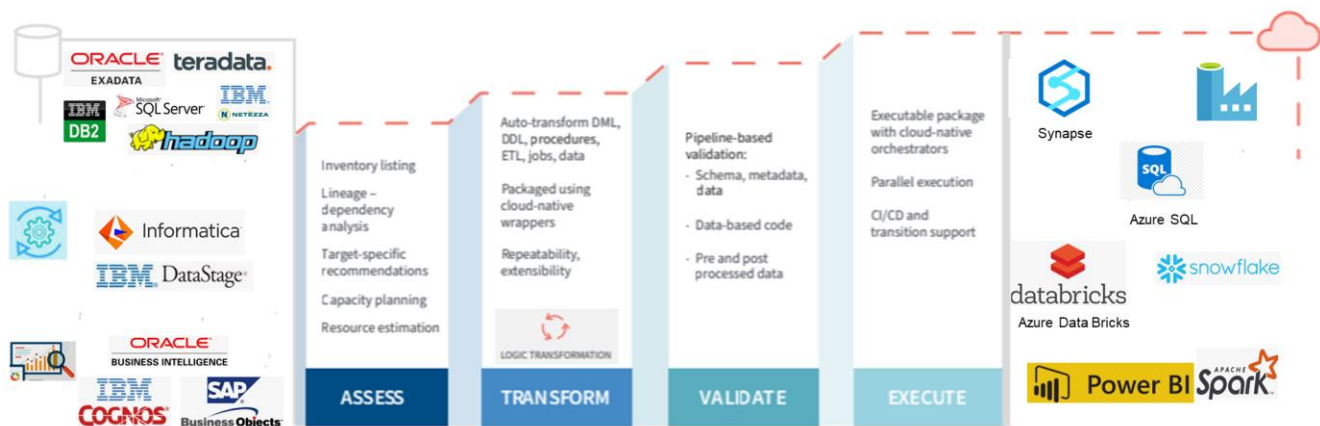

\*Illustrative list only

### Key Use Cases

- Data platform modernization without changing the application
- Cloudification reduces the cost and complexity
- ETL/ELT Modernization
- Reporting and Analytics Modernization
- Migration to commercial industry products and making data available from a modern system to provide both speed and value.

### Key Benefits

- Reduce overall migration effort from legacy platforms to Cloud Data Services up to 40%
- Improve time-to-market for data lake and data warehouse platform migration to Azure by 60%
- Configurable and reusable components library
- Leverage Unified Analytics and Governance, and amplified human output for a 30-70% increase in business ops

Gateway Suite is going to revolutionize the way we implement migration programs

#### BENEFITS

80% Effort Reduction in Data Estate discovery

Increase code compliance

30% Cycle Time reduction
