Managed Azure Platform/

Managed Azure Platform is the Supplier's service for providing management and support for Azure Network and Platform resources.

Azure Platform Management will provide the Customer with additional value and all the benefits associated with having a fully managed Azure environment, such as, but not limited to:

- Provide Azure Subscription
- Provide support on Azure public cloud configured solutions
- Request for MACDs in Azure will be processed defined by SLA
- Monitoring and alerts on Azure service health alarms.
- Fully managed Azureplatform based on Iver security compliance, architecture, and best practices
- Access to Azure consultants at Iver

Requests regarding Azure not covered by the service Azure Platform Management can be made to Iver Azure expert consultants.
