

Knowledge as a Service

A complete and innovative service.

3fifty fully understands that innovation in cloud and IT technologies is not the core business of every company. Within the 3fifty "Knowledge as a Service" solution, we deliver innovation, platform optimization and quality assurance. Because we use the latest Microsoft Cloud technologies within our service, customers are able to increase productivity, innovate more and reduce IT costs.

What is "Knowledge as a Service"?

The solution provides specific expertise on Microsoft Azure and 365. Because 3fifty uses the latest Microsoft technology within the service, customers are able to innovate more, work more efficient and optimize their costs.

Why customers use Knowledge as a Service
