

Azure Optimization Assessment

Your Cloud Infrastructure is Critical to Your Success.

To mitigate risks and save costs, you need to perform frequent checks on the health and performance of your cloud infrastructure.

Xavor's Cloud Assessment

The assessment is aimed at mitigating the costs and risks associated with non-scalable platforms, unplanned vertical/horizontal scaling or security breaches. We will complement your efforts to achieve your business goals by lowering costs, increasing workflow efficiency and improving business flexibility. Our team of experts will perform the following analyses to examine your cloud infrastructure, offering insights and reports that help you make the right choices.

**Servers/Apps
Performance Analysis**

**Resources Utilization
Assessment**

**Network and Security
Analysis**

Azure AD Analysis

**Data Security and
Privacy Analysis**

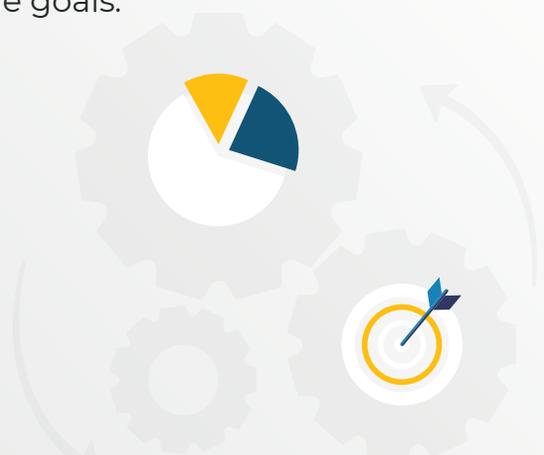

**Disaster Recovery
Analysis**

Key Features

Our experts solve the problem through ideation: this involves establishing the 5Ws (who, what, when, where and why) of client needs that help streamline the brainstorming process and inform the agenda and milestone goals.

- ✓ Certified Engineers
- ✓ Security & Compliance Experts
- ✓ Agile Project Management
- ✓ Track Record of Excellence
