Cloud Readiness Assessment

Building your roadmap to:
- Lower IT costs,
- More agile services to stakeholders,
- Better security & governance

We understand you face many issues on a daily basis

DevOps data breaches

Securing the IoT

The race to adopt AI

Generations colliding

Footloose talent

Scarce resources

Fragile "Frankenstacks"

Security Skill gaps

Defending borderless networks
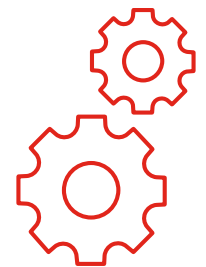

Managing multi-cloud deployments

But were you aware that...
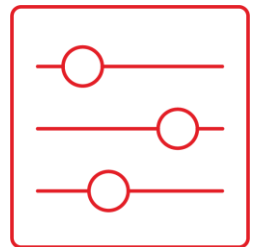

35%
of cloud spent is wasted

77%
of SMBs and enterprises say cloud security is a challenge

Thomas Duryea
LOGICALIS

What does this mean to your organisation?

1   A lack of transparency about true operational costs leads to

less confidence in public cloud as a strategy

2   Without a clear strategy for public cloud, IT is unable to

deliver on the business increasingly agile requirements

3   Missing out on the new security and governance capabilities

that are delivered with public cloud

**4**   A competitive disadvantage in the marketplace

contoso

A plan to move forward and fill the gaps

1. Real-world sizing estimates and cost expectations

2. List of incompatible workloads and a strategy for transformation

3. Overall strategy roadmap with budget costs
