

## Why Radware Security for Azure?

Radware Security for Azure is a fully managed security service jointly developed with Microsoft Azure. The service integrates the Azure DDoS service with Radware's cloud-delivered WAF technology, bot management capabilities, security analytics, threat detection and real-time security feeds in a single security portal. Radware Security for Azure provides the industry's most complete web application security solution, protecting applications against hacking, malicious bots, API exposure, DDoS attacks and other vulnerabilities.

### FULLY MANAGED SECURITY SERVICE

24x7 access to WAF experts who build, proactively monitor and fine-tune WAF policies against known and emerging threats in real time

### PROTECTION FOR EVERY THREAT SURFACE

A fully integrated security suite based on Radware's WAF, Bot Manager and threat intelligence feeds combined with application and volumetric DDoS protection

### INSTANT APP DEPLOYMENT WITH OPTIMIZED SECURITY

Unique auto-policy generation technology designed to secure a web application automatically with little or limited user interaction

## Radware Security Solution Components

**Global Azure Region Deployment** — Radware's security suite is delivered within Azure regions, providing automated and frictionless deployment at Azure scale sets. Running within Azure regions provides ultra-low latency based on Azure's global network with data residing in Azure regions to maintain customer data residency requirements.

**Web Application Firewall** — A WAF delivered within Azure for protection against OWASP Top 10 threats and zero-day web attacks using both a negative (signature-based) and positive security model with automatic security policy generation and adaptive security policies

**Bot Detection and Defense** — Advanced bot management solution using semisupervised machine learning to protect against new generations of bots that simulate human behavior and get past traditional bot defenses

**Security Analytics** — Sophisticated security analytic capabilities that analyze user behavior and provide granular insight into user and attacker behavior, so your organization knows what is happening within your applications

**Threat Intelligence** — Integrated with Radware's threat intelligence and active attacker feeds, providing the latest real-time data on your risk profile — stopping attacks and attackers before they target your applications

**Radware is a market leader in application availability and cybersecurity solutions for virtual, cloud and software-defined data centers.**

**Trusted and Proven** — Over 12,500 enterprise and carrier customers, including:

- ▶ 8 of the top 12 world's stock exchanges
- ▶ 10 of the top 20 world's commercial banks
- ▶ 5 of the top 10 world's retailers
- ▶ All 10 of the top 10 world's carriers
- ▶ 5 of the top 10 SaaS providers

Product of the Year

## Competitive Feature Comparison

	Radware Security for Azure	Azure Native WAF	WAF as a Service on Azure	Azure-Based WAF Appliances
				
Deployed directly within Azure	✓	✓	✓	✓
Fully managed security service	✓	✗	✗	✗
Positive security model	✓	✗	✗	Some solutions
Automatic traffic learning and auto-policy generation	✓	✗	✗	Some solutions
Fast, low-touch deployment	✓	✗	✓	✗
Integrated threat intelligence	✓	✗	Some solutions	✗
Advanced bot management	✓	✗	Some solutions	Some solutions

## Reference Architecture

## With Radware Security for Azure, You Can:

**Secure critical application workloads in Azure** with fully managed security services

**Use it in the cloud and on-premise**, with security services available in data centers and private and public cloud environments in Azure

**Use the *only* Azure-based managed security suite** operating within Azure regions to provide ultra-low latency and simplified regulatory compliance

---

### Target Industries:

**Retail** organizations that must comply with payment card industry (PCI) regulations

**Financial services** that store sensitive customer financial data

**Healthcare organizations** that protect sensitive patient data

**SaaS/technology/entertainment/gaming/education affiliations** that protect online services and intellectual property
