

AVD PoC – Eliminate any doubts

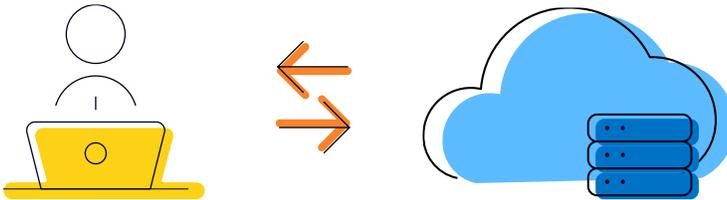

Not sure if Azure Virtual Desktop will meet your needs?
Test it out in a personalized AVD Proof of Concept!

Azure Virtual Desktop: Helping many customers to provide a secure managed workplace environment for all end users who use their own computers from home or from private mobile devices.

Azure Virtual Desktop – Proof of Concept

AVD PoC helps you to get a fast and reliable first experience with Azure Virtual Desktop based on your own needs and applications (limited to 3 applications). The created AVD image can be reused later in a production environment.

AVD PoC Offering

- Deep Insights in AVD technology on Azure
- Find out if your apps running well
- Run it in your isolated subscription
- Additional experience in platform automation based on the glueckkanja-gab Azure Foundation (light)
- First fully functional AVD image with 3 applications (reusable for production)
- Estimate costs and develop your Roadmap to AVD in production

Firsthand experience

- Friction free pilot Implementation
- Easy & Quick Insights in AVD
- Confidence that business goal is reached

Cost efficient & Secure

- Quick Implementation with automation for PoC Infrastructure
- Implementation with glueckkanja-gab AVD Blueprint
- Using Zero-Trust approach for high secure access

Flexible & Reliable Infrastructure

- AVD Environment with automatic up & down scaling
- Additional resources on demand
- Infrastructure as code model
- Versioning & Auditing included

Confidence in own AVD plans

Cost savings & secure environment

Secure & reliable automation

“Microsoft Virtual Desktops helped us to provide very fast, very agile and very economic home office workplaces”

~Dr. Andreas Schwarzer, Vice President Digital Strategy, FUCHS Petrolub SE
