

# Bridewell

## Cloud Security Posture Assessment for Microsoft Azure & Microsoft 365

Bridewell is a leading provider of cyber security, consultancy and managed services. A member of the Microsoft Intelligent Security Association and a Microsoft Gold partner, we're partnering with Microsoft to ensure that organisations have configured their Microsoft Azure and Microsoft 365 tenant securely, fully utilising the features available within their licensing model.

### The Cloud Security Posture Assessment Incorporates:

- A holistic technical assessment of your Microsoft Azure and Microsoft 365 tenancy
- An evaluation of your current security configuration
- Developing a plan to implement security features not currently utilised
- Provision of an assessment report, giving clear, concise guidance on each finding and how to remediate identified concerns

### Turning Security Challenges Into Enablers for Growth

Our recent **CNI Cyber Report: Risk & Resilience** study reports 93% of those surveyed having experienced at least one successful cyber attack in the past 12 months. Implementing security strategies to meet these challenges is not about merely applying greater number of controls, but identifying and implementing the most appropriate measures to help mitigate against the threats. In doing so, security strategy can create competitive edge. Through understanding individual business requirements, development and transformation needs, set against the cyber threat landscape, our Cloud Security Posture Assessment can help you stay one step ahead.

Member of  
Microsoft Intelligent  
Security Association

### Bridewell's Cloud Security Posture Assessment covers:

- **Identity and Access Management**  
Protecting users through securing accounts and ensuring appropriate access control policies are implemented
- **Threat Protection and Cloud Security**  
Minimising risk of attack across endpoint, mail, cloud and web, through appropriate Microsoft Defender configuration
- **Data Protection**  
Ensuring labelling is applied consistently, Data Loss Prevention is appropriately configured, and data sharing is monitored and controlled
- **Endpoint Management**  
Defining appropriate device and mobile application management processes to protect corporate and non-corporate devices
- **Security Management**  
Integrating with existing procedures and processes to ensure that configuration and security changes are properly managed and governed

## Identity & Access Management

- Single Sign on and Self-Service Rest
- Multifactor Authentication
- Conditional Access
- Privileged Access Management
- Identity Governance
- Active Directory Identity Protection

## Endpoint Management

- Mobile Application Management
- Mobile Device Management

## Data Protection

- Data Discovery
- Data Classification
- Data Loss Prevention
- Insider Risk Management
- Device Encryption
- Secrets Management
- Information and Messaging Encryption

## Cloud Security

- Cloud Access Security Broker
- Cloud Security Posture

## Threat Protection

- Endpoint Detection and Response
- Endpoint Protection Platform
- Forensic Tools
- Intrusion Prevention System
- Threat Vulnerability Management
- Anti-phishing
- User and Entity Behaviour Analytics
- Threat Intelligence Feeds
- App and Browser Isolation
- Attachment Sandboxing
- Application Control
- End-user Training
- Network Firewall (URL Detonation)
- Host Firewall
- Secure Email Gateway
- Security Assessment
- SIEM
- SOAR
- Incident Response Services
- DDoS Protection
- IoT Protection

# About Bridewell

Trusted globally by highly-regulated and complex organisations to deliver tailored cyber security, managed security, penetration testing and data privacy services, providing protection against cyber attacks and driving continuous transformation.

Bridewell are a PCI DSS QSA company with NCSC, CREST, ASSURE, IASME Consortium, SOC2, Cyber Essentials Plus, ISO27001, and ISO9001 accreditations. It's award-winning team of experts, comprised of highly trained and certified consultants work closely to understand organisations key challenges and ambitions, creating flexible outcome-focussed solutions to strengthen cyber security posture, ensuring business continuity by keeping them protected and productive from the inside out.

In today's ever-changing digital economy, the importance placed upon critical infrastructure cannot be underestimated, with clients in sectors including transport and aviation, financial services, oil and gas, government and communications. Bridewell can be trusted to deliver solutions that keep critical services running and ultimately deliver real business impact. **Together.**
